'17 AGROMECK

FOUR ACES AND A QUEEN

THE AGROMECK
NINETEEN HUNDRED AND SEVENTEEN

The year book of the
north Carolina Agricultural
and Mechanical College

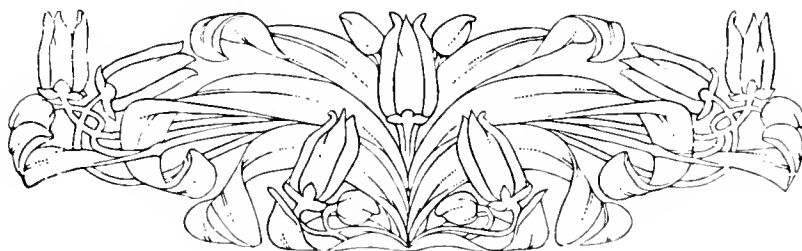

AND here it is, gentlemen, at last. As our old friend and fellow sufferer, Billy Shakespeare, would say, “In sooth it seems like a book; it looks like a book; Ye Gods, it is a book.” Yes, sad as it may seem, it is a book—the Nineteen-Seventeen AGROMECK, and we shall feel well repaid for any work we may have put on it if it may meet with your approbation.

“As usual” this year has been especially uneventful, but we have tried to inject as much local color as possible. We must admit that it contains many things that we had not originally expected, and also that a number of things that we HAD expected are not in it. But “the best laid schemes of mice and men,” you know, and all that, so we can’t say we hadn’t anticipated something of the sort, or that we’re bitterly disappointed that some of our hopes failed to materialize. Indeed, we don’t think that we could do any better if we had it to do over again, and most probably not so well. In fact, so far as our doing it over again is concerned, the thing we’re most positive about is that we wouldn’t.

We may as well take our readers into our confidence and tell them what we had hoped to do in this book. We're afraid that if we don't tell them they'll never find out, and we don't want to miss getting credit for good intentions at least.

First we wanted the book to be *distinctive*, that is, we wanted it to possess some essential work or tone of its own, by which it might be distinguished from other volumes of THE AGROMECK. Then, we wanted the book to be *representative*, by which we mean that we wanted it to be a picture, both grave and gay, of the year 1916-17 at A. and M. We wanted the picture to be clear enough so that when the day comes, years hence, as come it surely will, not once but many times, to every one of us, when we shall recall (with Oh, what depth of longing!) Campus and Class Room and Dorm, and the friends with whom they are peopled now, we may bring out this book and find them all again. We hoped that in such a time pillar and shade, long grown dim thru the mist of years between, might stand forth clear again as yesterday in the turning of these pages; and forms once loved but long forgotten might start again into life: that in such an hour this book might be our guide along many a forgotten path in the pleasant Land of Long Ago.

—J. B. P.

*THE GOVERNOR'S
INAUGURATION*

SENIOR CLASS HISTORY

IN September, 1913, there were two hundred and forty of us. Now we number only seventy-five. Three of our number—W. S. Bridges, J. F. Williams, and R. C. Young were prevented from returning last fall. Williams, who returned on parole, finished with us. Bridges and Young were unable to rejoin us. We deplore their absence, and hope that they will return and complete their courses with the Class of Eighteen.

Our Class has taken a high stand in scholarship, as is shown by the monthly honor rolls.

In athletics, we are second to none. We have given to the football team: Artz, C. C. Cooke, McDougall, Sullivan, Tenney, and Van Brocklin, names that will not soon be forgotten by lovers of the gridiron sport. Gammon, Hodgkin, P. W. Johnson, W. M. Johnson, and Wheeler are well known to baseball fans. W. M. Johnson and Temple represent us in basket-ball; while McDougall, Milsaps, and Scott have won honors on the cinder path.

We have been well represented on the intercollegiate debating teams—D. A. Monroe, W. K. Scott, and J. F. Williams having won more debates than any other three A. and M. men. R. W. McGeachy was the A. and M. representative at the intercollegiate oratorical contest held at Durham last year.

As a Class, we have been active in promoting the best interests of our College. At the suggestion of Captain Broadhurst, we introduced important reforms in the dining-hall. We led in the movement which made every student a member of the Y. M. C. A.; and it was our Class, under the energetic and effective leadership of L. E. Wooten, that made the new concrete bleachers possible.

While the Class of Seventeen is not the largest Class that ever finished, it is safe to say that none has left a better record.

—HISTORIAN

SENIOR CLASS OFFICERS

J. E. McDOUGALL.....	<i>President</i>
W. C. DODSON.....	<i>Vice-President</i>
L. E. WOOTEN.....	<i>Secretary-Treasurer</i>
W. E. MATTHEWS.....	<i>Historian</i>
E. P. HOLMES.....	<i>Poet</i>
T. P. SIMMONS.....	<i>Prophet</i>

SENIOR CLASS POEM

Some new little Seniors have been launched on the sea,

Some new little minds are unfurled:

Here's hoping the world may be good to them,

And they may be good to the world.

The College has taught them how to be men,

By patience and guidance and rule:

Here's hoping the school has been good to them,

And they may be good to the school.

Their love is pointing the way they should go,

Since these new little minds are unfurled:

Here's hoping she may be good to them,

And they may be good to their girl.

The anchor is pulled from the harbor of hope,

Now the ripples cease to run:

They are sightless now, and all is still,

And the Seniors and fate are one.

—E. P. H.

JOHN WELSFORD ARTZ.....Old Fort, N. C.

"JOHNNIE"

Agriculture

Age, 23; Height, 6 ft.; Weight, 160

Freshman Football Team; Football Squad (1); President Sophomore Class; Varsity Football (2); Assistant Manager Baseball (3), Manager (4); Y. M. C. A.; Company "Q"; Σ Φ Ε.

+

"JOHN ARTZ"—the most popular man in the Class. He is ever the same, never worried, never grouchy, never discouraged; but just "JOHNNIE." He has a good word for everyone; he loves his neighbor and himself alike. Strong in every way, straightforward, honest, and upright. To quote Coach Hegarty, "this 'JOHN ARTZ' is a prince of a guy."

Altho lightweight, "JOHNNIE" is one of the best linemen that ever represented A. and M. on the gridiron. On account of injuries, he was unable to play but two years.

+ + +

GEORGE GANZER AVANT.....Wilmington, N. C.

"HAPPY"

Electrical Engineering

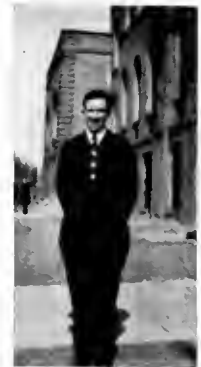

Age, 21; Height, 5 ft. 9 ins.; Weight, 135

Corporal; First Sergeant; Captain and Adjutant; Y. M. C. A.; Vice-President New Hanover County Club; Pullen Literary Society; Electrical Engineering Society.

+

Yes, Sir; he is the ADJUTANT. He may not be the man who is to fill Edison's place; and it may be true that a girl saw him once, and didn't rave over him; but say, Mister, you ought to see him at Regimental parade. Just how old he is, none knows, for he has lots of birthday parties, and then doesn't come to them. Anyway, he is a good scout.

JOHN WILLIAM AVERA.....Smithfield, N. C.

"JOHNNIE"

Agriculture

Age, 20; Height, 6 ft. 2 ins.; Weight, 165

Sergeant; First Lieutenant Company "H"; Y. M. C. A.;
Agricultural Club; Class Football; German Club; "Bar-
becue"; Skull and Bones.

"JOHNNIE" is the society man of our Class. He loves the ladies; and they just will not let him alone. He has specialized in Agronomy; and when not with the ladies he may be found on the basket-ball floor. "JOHNNIE" is a good fellow, and has been a loyal member of the Class of Nineteen-Seventeen.

GEORGE GARLAND BAKER.....Washington, N. C.

"BAKE"

Mechanical Engineering

Age, 21; Height, 5 ft. 8 ins.; Weight, 135

Class Poet; Critic Mechanical Engineering Society;
Y. M. C. A. Cabinet; Captain and Drum Major of Band.

In him we see the theory of the impossibility of perpetual motion completely discredited. Seldom still, and yet more seldom silent, he is energy personified. And then he is versatile, too. None but a genius could strut across the drill ground as "BAKE" does, and then equal him when it comes to taking the starch out of a Freshman.

JOHN ROBIN BAUCOM.....Raleigh, N. C.

"SISTER"

Agriculture

Age, 22; Height, 5 ft. 10 ins.; Weight, 138

Agricultural Club; Y. M. C. A.; Pullen Literary Society; Sergeant Company "A" (3); Company "D"; Biological Club; Class Baseball Team (3); Tennis Club; Associate Editor "Red and White" (4).

+

"SISTER BAUCOM" is a man of sterling character and unimpeachable purity of life. He believes that "clothes make the man." He has specialized in Animal Husbandry, and swears that crimson clover will be the salvation of the South. Altho he is a "perfect lady," we predict for him success as a "chod-knocker." "SISTER" is a good fellow, and he is liked by all.

✦ ✦ ✦

T. Y. BLANTON.....Mooresboro, N. C.

"T. Y."

Agriculture

Age, 25; Height, 6 ft.; Weight, 150

Y. M. C. A.; Leazar Literary Society; Agricultural Club; Bi-Ag Club; Class Historian (2); Editor-in-Chief "Red and White" (4); A. Z.

+

As Editor-in-Chief of the "Red and White," "T. Y." has demonstrated his ability as a writer and a thinker. Under his guidance, the "Red and White" has been a success for the first time in a number of years. Possessed of a literary nature, he has decided to impart his knowledge to the youth in the Farm Life Schools of North Carolina. "T. Y." is a good fellow, and his success as a teacher is assured.

BARRETT W. BOULWARE...Black Mountain, N. C.

"Doc"

Electrical Engineering

Age, 24; Height, 5 ft. 9 ins.; Weight, 150

Electrical Engineering Society; Company "Q."

"B. W." made an awfully bad start, by putting in the first two years of his college course down in South Carolina somewhere; but he realized his mistake, and came to us two years ago. We prophesy a great future for him, if someone will invent a "foolproof" adding machine.

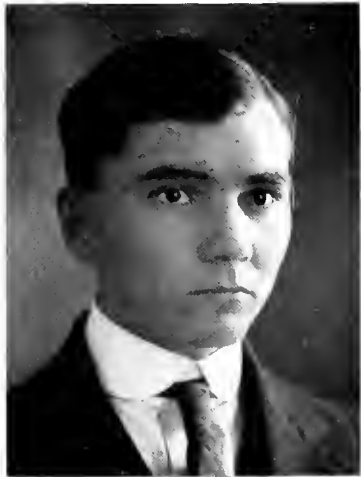

ZEBULON BOYCE BRADFORD...Huntersville, N. C.

"BRAD"

Textile

Age, 22; Height, 5 ft. 8 ins.; Weight, 145

First Lieutenant Company "E"; Tompkins Textile Society.

"One of the Boys," but steady, conservative, and quiet. There has never been a hint of romance connected with "BRAD," so far as has been ascertainable. Could that old stuff about "Still waters running still," or deep, or quiet, or something, be used in this case?

But to see this fellow shift his quid of tobacco, put on a grin, and stick out his hand; and to hear his slow drawing "Howdy." Gee! It's great!

NOAH BURFOOT, JR.....Elizabeth City, N. C.

"JOHNNIE"

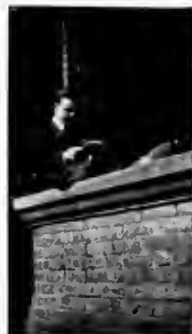

Textile Engineering

Age, 22; Height, 5 ft. 7 ins.; Weight, 132

Tompkins Textile Society; Assistant Business Manager "Agromeck"; Y. M. C. A.; Pan-Hellenic Council; K. A.

"A good man is 'MR. BURFUTE'"—he'll split his last dollar with you, and when you've made a friend of him, you've made a friend worth having. Everybody likes this man; but we can't understand why he wants to leave us, and go back to Elizabeth City. We've seen him stumbling away from the postoffice with his eyes glued to big, thick letters—maybe that's got something to do with it. He has Spanish the second hour, and sometimes Hugh H. has to wake him up, and send him on Class. In spite of these things—which are not real faults—"JOHNNIE" is one of the best all-round fellows we know—the kind that make graduation hard.

ALMON HILL CARTER.....Wallace, N. C.

"NICK"

Agriculture

Age, 20; Height, 5 ft. 6 ins.; Weight, 125

German Club; Leazar Literary Society; Agricultural Club; Tennis Club; Duplin County Club; Company "Q"; "Barbecue"; H. K. A.

"NICK" has an ability to do things that is almost equal to the reputation of his fictional namesake. He is a good student; a quiet, but energetic worker. "NICK" is one of the smallest members of the Animal Husbandry Division, in size; but his ability to rank near the top in his classes proves that his intellectual capacity is large. He possesses the tact of a manager and salesman.

"NICK" is well liked by all, and without him the Animal Husbandry Division would doubtless perish.

MARSH HUTZLER CHEDESTER.....Asheville, N. C.

"M. H."

Electrical Engineering

Age, 21; Height, 5 ft. 8½ ins.; Weight, 157

Electrical Engineering Society; Y. M. C. A.; Corporal; Sergeant; Lieutenant.

There may be a great many men here who spend the better part of their time doing nothing. But no one can accuse "MARSH" of belonging to this class. He can boss a dynamo around, or a motorcycle; but when he tried the same tactics on the Artillery — "Nuf Sed."

AMBROSE SCHENCK CLINE.....Lincolnton, N. C.

"COLONEL"

Agriculture

Age, 27; Height, 5 ft. 7¼ ins.; Weight, 160

Honors in Scholarship four years; Punctuality Roll four years; Corporal (2); First Sergeant (3); Captain (4); Vice-President (3); President (4); Critic (4); Pullen Literary Society; Secretary (2); Vice-President (3); President (4); Agricultural Club; Vice-President Y. M. C. A. (4); Debating Council (3); Inter-Society Orator (3, 4); Sophomore Debater (2); Junior Debater (3); Senior Debater (4); Assistant Manager "Agromeck" (3); Associate Editor "Red and White" (4); Bi-Ag Society (3, 4); "Barbecue."

"COLONEL CLINE'S" record stands to prove anything we might care to say about him. He has always taken a very active part in college life. His successful career as leader of various organizations demonstrates his merits as a leader in the business world. Besides his interest in activities, "CLINE" has averaged above ninety in all of his work for four years.

His straightforward manner, coupled with undying energy, and the desire to do things, will surely lead to the topmost rungs of the ladder of success.

JAMES WESLEY COOPER.....Henderson, N. C.

"JIMMIE"

Textile

Age, 21; Height, 5 ft. 6 ins.; Weight, 140

Textile Society; Warrenton High School Club; Y. M. C. A.; First Lieutenant Company "B"; Σ Φ Ε.

+

One of Professor Park's "esteemed contemporaries" is this; and in spite of it, we all like him. Why, he once gave a party in his room to the Textile Seniors, which, according to all reports, was unique in local history. It seems that some things really unusual did happen, but reports have been suppressed.

He and "Doctor" Parsons go to all the shows, and most of the barbecues; they have even been seen at dances, and at Church, by the weary and watchful.

Why is it we must say Good Bye to such fellows?

✦ ✦ ✦

GEORGE CHANDLER COX.....Cullowhee, N. C.

"G. C."

Electrical Engineering

Age, 21; Height, 5 ft. 10 ins.; Weight, 173

Honors in Scholarship, one year; Y. M. C. A.; Electrical Engineering Society; German Club; Leazar Literary Society; Company "Q"; Skull and Bones.

+

And here we have the official genius of the Class. It may be that he has many of the eccentricities that go to make up a genius; but then he is the real article, which is shown by his doing the seemingly impossible in taking the full course in three years. He apparently has an unbounded capacity for hard work, and for "Starting Something." It has been an awfully good thing for the peace of mind of the Faculty that he has been rather busy with his work.

FRANCIS EDWIN COX.....Red Springs, N. C.

"PUSS"

Electrical Engineering

Age, 22; Height, 6 ft.; Weight, 163

Chairman Electrical Engineering Society; Secretary and Treasurer Radio Club; Corporal; Sergeant; Y. M. C. A.; Warrenton High School Club; Company "Q."

+

Four years ago, "FRANCIS" got tired of raising dewberries down on the home place, and decided that he would like to try his hand at currents. He came here determined to do or die—and he is not dead. If he has as much Electrical information in his head as he has junk in his room, he is some star!

✦ ✦ ✦

CHARLES WEBB DAVIS.....Beaufort, N. C.

"SENATOR"

Civil Engineering

Age, 28; Height, 5 ft. 11¼ ins; Weight, 132

Instructor in Mathematics (1); Y. M. C. A.; President Wilson-Bickett-Gardner Club; Treasurer Y. M. C. A. (3).

+

This young man graduated as a Civil Engineer, but he missed his calling. His long suit is politics. Keep up the milk diet, "SENATOR," and cultivate a bay window, and you will be there with the appearance as well as the ability.

"C. W. DAVIS" for President, 1932, is our best bet.

WILLIAM PRESSLY DAVIS.....Stovall, N. C.

"PRESSLY"

Civil Engineering

Age, 21; Height, 6 ft.; Weight, 160

Y. M. C. A.; Company "Q"; Class Baseball (1, 2, 3), Manager (2), Elected Manager (3); Substitute Varsity Baseball (3); Class Football (3); Sergeant (3); Civil Engineering Society; Division Inspector.

+

"PRESSLY" is one of those quiet, unassuming fellows whom everybody likes, and who generally manages to be right in front at the finish. His Freshmen say he's one of the best inspectors on the hill—and when a Freshman says that about a man, you may put him down as O. K. He is a good student, a good friend, and a hard worker. In short, "PRESSLY" is an all-round good fellow, and we expect him to help make a name for Nineteen-Seventeen.

+ + +

ALBERT GEORGE DAY.....Trenton, N. C.

"GEORGE"

Electrical Engineering

Age, 21; Height, 5 ft. 9 ins.; Weight, 160

Honors in Punctuality; Leazar Literary Society; Y. M. C. A.; Electrical Engineering Society; Company "Q."

+

"GEORGE" is a "Tarheel" only for the time being. It is easy to see, by the uneasy glint in his eyes, that he longs for the rice pots of the "Sandlappers." We did have hopes for awhile that something in "P. G.'s" office might hold him; but it can't be done. We fear that the State is going to lose a good citizen in June.

WILLIAM CARTER DODSON.....Fayetteville, N. C.

"BILL"

Textile Engineering

Age, 21; Height, 5 ft. 11 ins.; Weight, 145

Country Club; German Club; Treasurer (4), Vice-President Senior Class; Vice-President Class (1); Class Football (1), Manager (1); Secretary-Treasurer Textile Society (2); Assistant Manager Basket-Ball (3); Associate Editor "Agromeck"; K A.

+

It is hardly enough to say that "BILL" is one of the most popular men in college. He is the Prince of the Cotton Mill; a prominent founder of the local order of Tea-Hounds; a tourist of rare experiences. He can beat Robert W. Service at his own game; and if George Barr McCutcheon but knew him he would beyond doubt have a character for a novel that would make "Truxton King" look as cheap as a health bulletin. At his chosen profession—a spinner of yarns—he is in a class of his own.

✦ ✦ ✦

MYNAR CECIL DONNELL.....Greensboro, N. C.

"RED"

Age, 21; Height, 5 ft. 10 ins.; Weight, 160

Scrub Football Team (1, 2, 3, 4); Scrub Baseball Team (1, 2, 3, 4); Scrub Basket-Ball Team (1, 2, 3, 4); Captain Class Football Team (3); Captain Class Basket-Ball Team (2); Class Baseball (1, 2, 3, 4); Y. M. C. A.; Company "Q."

+

The success of a college in athletics is due to such men as "RED"—the scrubs. For four years "RED" has worked for his letter in vain. But was it in vain? Those of us who know him, know that A. and M.'s success in athletics during the past four years has been due, in no small measure, to this man. He has also been the mainstay of all the Nineteen-Seventeen class teams. "RED" hails from the village of Greensboro; and he is proud of that fact. If there was ever a man without an enemy, "RED" must be that man's brother.

WILLIAM HENRY ELLIOTT.....Thornwall, N. C.

"W. H."

Agriculture

Age, 24; Height, 6 ft.; Weight, 170

Secretary and Treasurer Warrenton High School Club; Team Manager (3), Censor (4), Vice-President (3), Pullen Literary Society; Vice-President (3), Baa and Bellow Club; Vice-President of Class (3); Y. M. C. A. (1, 2, 3, 4); Corporal Company "G"; Sergeant Company "C"; Captain Company "D."

Tell him Hughes should have been elected, and he will fight you. "WILLIAM" is slow to act, but once he decides to make a move nothing can stop him. Without him, farmers' Day might never have been. "WILLIAM" is a soldier of repute. He is one of the best and most popular captains on the "hill." If you don't believe it, ask his sponsor. He is an all-round good fellow, and we predict for him great success as a farmer.

ARTHUR CRAWFORD FOSTER.....Atlanta, Ga.

Agriculture

Age, 24; Height, 6 ft.; Weight, 160

Student Alabama Polytechnic Institute, 1910-1914; Student Assistant in Agronomy and Plant Breeding, Alabama Polytechnic Institute, 1910-1915; Fellow in Botany, Alabama Polytechnic Institute, 1912-1915; Assistant Seed Analyst and Research Fellow in Botany, New Jersey Agricultural Experiment Station, 1915; Student University of Chicago, 1916.

"FOSTER" came to us from the University of Chicago. His record shows his honors. He is a true scientist, in every sense of the word. As a student, and as an instructor, he has made good at A. and M. Foster is a congenial and popular fellow. Highly efficient, exact, and energetic, he is destined to be a valuable factor to the world of science. A. and M. is proud of her "FOSTER-son."

DANIEL R. S. FRAZIER, JR.....King's Creek, N. C.

Civil Engineering

Age, 19; Height, 5 ft. 11½ ins.; Weight, 180

Class Football (1); Corporal (2); Sergeant (3); Company "Q"; ΔΣΦ.

+

Here's another one of those big, good-natured fellows, with a smile that won't come off. He started with us in Thirteen; but we'll have to leave him behind us when we disband in May. We hate to do it, and we'll miss him; but we are betting on him to make things hum when he does put that sheepskin to work. He's learned what a responsible position a Senior has, and we are going to depend on him to take good care of the Class of Eighteen—just as he has watched over the Freshmen in Watauga for two years.

+ + +

FREDERICK C. GARDNER.....Rocky Mount, N. C.

"BUM"

Civil Engineering

Age, 22; Height, 5 ft. 10½ ins.; Weight, 155

Class Football (2, 3); Manager Class Football (2); Class Baseball (1, 2, 3); Class Basket-Ball (1, 2, 3); Manager Class Baseball (1); Vice-President Rocky Mount Club (2); President (3); Assistant Manager Varsity Football (3); Manager Varsity Football (4); Varsity Baseball Squad (2, 3); Varsity Basket-Ball Squad (2, 3); German Club Floor Manager (3, 4); Honors in Scholarship (3); ΔΣΦ.

+

We should like to know "GEORGE" better; but he spends so much of his time going to the postoffice that we really don't have time to get acquainted with him. His chief occupations, while he is not on the road to the postoffice, are reading his daily letter, and gazing at the name carved on his pipe. His favorite expression on class is, "Fesser, it's right on the end of my tongue, but I just can't say it."

JOHN LEROI GREGSON.....Elizabeth City, N. C.

"DAD LEM"

Civil Engineering

Age, 21; Height, 5 ft. 9 ins.; Weight, 160

Private Company "B" (1); Private Company "G" (2);
Sergeant Company "H"; Captain Company "E"; Y. M.
C. A. (2, 4).

+

This man does not waste his energy in much speaking; but when he does talk he usually says something worth hearing. He is not given to profanity. His vilest oath is "Dad Lem." This epithet he uses on all occasions, both as an expression of esteem and as a term of reproach.

+ + +

FRANK JOSHUA HAIGHT.....Balsam, N. C.

"FRANK"

Electrical Engineering

Age, 23; Height, 5 ft. 7½ ins.; Weight, 145

Corporal (2); Sergeant (3); Captain Company "B" (4);
Y. M. C. A.; Secretary and Treasurer Electrical Engineering
Society (4); Punctuality Roll.

+

Altho quiet, and inclined to be studious, "HAIGHT" numbers every man in the Class among his friends. His hobby seems to be keeping his own counsel; and his weaknesses are rooming in the top of 1911 Dormitory, and staying at the top of his Class.

CARL RUSH HARRIS.....Mount Gilead, N. C.

"C. R."

Textile

Age, 21; Height, 5 ft. 9 ins.; Weight, 145

German Club; President Textile Society; First Lieutenant Company "D"; Corporal (2); Sergeant (3); Φ Ψ.

+

For three years this young fellow studied hard, stayed close to the campus, and made nineties. Why did he have to leave these exemplary paths in this, his last, his only Senior year? We have questioned, we have debated, we have inquired, and at last we have reached a verdict—he really thinks he's in love. According to his room-mate, the only perceptible advantage is a more "churchlike" vocabulary. A distinct disadvantage, however, which affects this is the trouble of keeping him supplied with stationery.

How is he in the mill? Well, ask Professor Nelson.

+ + +

ADOLPH THEODORE HARTMAN.....Charlotte, N. C.

"POKE." "KID"

Civil Engineering

Age, 20; Height, 5 ft. 10 ins.; Weight, 150

Class Basket-Ball Captain (1); Class Baseball (2, 3); Class Football (3); Varsity Basket-Ball Squad (2, 3); Assistant Manager Baseball (3); President Athletic Association (4); Manager Class Basket-Ball (2); Corporal (2); Ex-Sheriff of Watauga.

+

"POKE'S" popularity is shown by the fact that he is the only man ever elected to succeed himself as president of the Athletic Association. He studies some, and gets along well with his work. The Faculty owes him undying gratitude for his efforts to keep order in Watauga during his sojourn there.

HENRY W. HAYWARD.....Mount Gilead, N. C.

"HENRY"

Mechanical Engineering

Age, 21; Height, 5 ft. 9 ins.; Weight, 135

German Club; President Mechanical Engineering Society; President Montgomery County Club; Vice-President Athletic Association; Corporal; Company "Q"; ΔΣΦ.

How little "HENNERY" has growed." Once one of the infants of the Class, he has developed into the man of affairs that he now is. And believe me he is some h—ll with the ladies. Despite all this, he is a regular fellow; and he went to Milwaukee last summer. Let him tell you about it.

JOHN WADE HENDRICKS.....Farmington, N. C.

"J. WADE"

Agriculture

Age, 23; Height, 6 ft.; Weight, 170

President Pullen Literary Society (4); Inter-Society Senior Debate; Critic Agricultural Club (4); Y. M. C. A.; Bible Class Group Leader; Vice-President College Corn Club (4); Corporal; Sergeant; Captain "F" Company; Class Basket-Ball; President Davie County Club (4); President Midnight Club (4).

"J. WADE" is a product of Liberty Piedmont Institute. He came with the determination to make good; and he has. He is one of the strongest speakers in the Class. To see this lad on dress parade, is to see an ideal officer. He leads his Company as only a true soldier could.

"WADE'S" college career has been a most successful one. We have never learned of but one deficiency, and that—well, he fell in love, and we fear he has lost his heart. He is a hard worker, a thoro student, and a fellow that we just naturally like.

BRUCE DUNSTON HODGES.....Washington, N. C.

"BRUCE," "B. D."

Mechanical Engineering

Age, 20; Height, 5 ft. 7½ ins.; Weight, 150

Corporal (2); Sergeant (3); Captain Company "C" (4);
Class Football (3); German Club; Commencement Marshal
(3); Σ Φ Ε.

+

"Seen B. D.?" "Yeh—up at Brantley's." Ever heard this around Bud's, on Mondays? It seldom happens, for anybody who wants to see him knows where to find him when the girls are out—he will stand out in front and tantalize them. Some heartbreaker, this boy—ask him what he did at the Fair. He keeps right up in his work, tho; has no bad habits (a C. E., too); and is an all-round good fellow.

+ + +

WILLIAM HERBERT HODGIN.....Jamestown, N. C.

"HODGE"

Textile

Age, 20; Height, 5 ft. 9 ins.; Weight, 165

Varsity Baseball (1, 2, 3, 4), Captain (4); Football (2,
3, 4); Guilford County Club; Textile Society; Company
"Q"; Φ Ψ.

+

Ah, "HODGE!" Without thee, whence would come all of our very newest slang—all of our baseball dope? Whence the diamond accent which makes us forget even the multitudinous questions of our contemporary Parsons?

In "HODGE" we have a baseball captain who knows how to play the old national game, and who knows that he knows how. If you don't believe it, ask him.

We hear that he manages to pass off his work; but we aren't so sure of this. There's one thing we are sure of, tho, and that is—to know him, is to like him.

EDISON PARKER HOLMES.....Marion, N. C.

"E. P."

Electrical Engineering

Age, 21; Height, 5 ft. 11 ins.; Weight, 148

Vice-President Electrical Engineering Society; Sergeant Leazar Literary Society; Y. M. C. A.; Assistant Editor "Wau Gau Rac"; Assistant Editor "Red and White"; Class Poet; Originator of "Royal Conclave of the Sons of Eli"; H K A.

+

Have you ever seen a purple cow? Neither have we; but here is an engineer, and an electrical one at that, who is a poet as well. And the queer part of it is that it seems to be a very good combination. He is the queerest sort of a chap, and it goes without saying that we all like him.

+ + +

EDWARD HOLLAND HOLTON....Winston-Salem, N. C.

"SHINE"

Agriculture

Age, 20; Height, 6 ft. 2 ins.; Weight, 190

Y. M. C. A. (1, 2, 3, 4); Pullen Literary Society (2, 3, 4), Censor (4); President Agricultural Club (4); Sub-Class Football (1); Class Football (2, 3); Class Basket-Ball (1, 2, 3, 4), Captain (2); Class Baseball (3); Corporal; Sergeant; Captain Company "H"; Chief Justice of Watauga; "Barbecue."

+

Well, look who's here! It is "SHINE," of military fame. This big boy can laugh louder and longer than anybody at A. and M. He presides over Watauga in a masterful manner, just as he will some day preside as president of the Forsyth Agricultural Society. Full of wit and fun, and a corking good fellow, "SHINE" will never be forgotten by any of his classmates.

ROBERT MULLEN HOOPER.....Beaufort, N. C.

"LANKY"

Electrical Engineering

Age, 23; Height, 6 ft. 2½ ins.; Weight, 155

Secretary and Treasurer Electrical Engineering Society.

+

"HOOPER'S" specialty seems to be length as regards legs, and brevity as regard speech; but these are the only extremes that can be found in his make-up. In his work, and on the campus, he is one of the steady, conservative sort of fellows that give balance to the student-body.

✦ ✦ ✦

WILLIAM RANSOM HOOTS.....Jennings, N. C.

"W. R."

Agriculture

Age, 26; Height, 5 ft. 8 ins.; Weight, 160

"My honors are in the future."

+

"HOOTS" is so very busy that we see very little of him. A born horticulturist, he has specialized in tree surgery; and a better tree doctor has never left A. and M. When not on Class, he may be found around the greenhouses, orchard, or studying the landscape. "HOOTS" is a good fellow, and is liked by all who know him. He swears by Professor Pillsbury, and horticulture.

FRANK WILLIAM HOWARD.....Bridgeport, Conn.

"FRANKIE"

Civil Engineering

Age, 28; Height, 5 ft. 8½ ins.; Weight, 149

Y. M. C. A. (1, 2, 3, 4); Assistant Secretary (4); Secretary and Treasurer Freshman Class; Basket-Ball Squad (1), Substitute (2); Corporal (2); First Sergeant (3); Appointed Captain Company "C"; (4); Inspector (4); Associate Editor "Red and White" (4).

+

"FRANKIE" came to us from the far North—a bred-in-the-bone Yankee, and a good one—took a good look at the Y. M. C. A., and decided that he liked it pretty well. So he waded in, and now he is quite an authority there. A good student, a good fellow, and a straightforward gentleman, this boy is bound to get there. We expect to hear great things from the North when we turn "FRANKIE" loose on them.

+ + +

JOHN ELI IVEY.....Norwood, N. C.

"J. E."

Agriculture

Age, 21; Height, 5 ft. 10 ins.; Weight, 143

Y. M. C. A.; Baa and Bellow Club; Agricultural Club; Pres. Poultry Science Club (4); Bus. Mgr. "College Directory" (3), Ed-in-Chief (4); Commencement Marshal (1, 3); Honors—Scholarship three years; Sec'y and Treas. Stanley Co. Club (2); Critic Leazar Literary Society (4), Senior Debater; Corporal Company "A" (2); Sergeant Company "F" (3); Asso. Ed. "Red and White" (4); National Poultry Judging Team (4); State Stock Judging Team (4); Student Instructor Poultry Science (4); Asst. in Poultry Investigations, N. C. Experiment Station (4); Company "Q"; A. Z.

Here comes "the Professor!" "JOHN" is one of the busiest men in the Class. As Assistant Instructor in Poultry, and as Assistant in Poultry Investigations and Pathology, "JOHN" has made good—ask Dr. Kaupp. He loves the ladies; and this, added to his other duties, makes him so busy that we see very little of him. He is a born business man, and is bound to succeed in his chosen profession. "JOHN" is a "king" of a fellow, and the Class of Nineteen-Seven-teen is proud of the fact that he is one of their number.

PAUL WORTHY JOHNSON.....Raeford, N. C.

"PAUL" "P. W."

Agriculture

Age, 20; Height, 6 ft.; Weight, 175

Assistant Manager Varsity Football Team (3); Varsity Baseball Team (2, 3, 4); Secretary and Treasurer Class (2); Commencement Marshal (2); Associate Editor "Agromeck"; State and Interstate Stock Judging Team; Company "Q"; "Barbecue"; Σ Φ Ε.

"PAUL" is another Warrenton High-School man who has made good. He is one of the best first basemen who has ever donned the Red and White uniform; and that is saying a lot. He has enjoyed the distinction of being the best fielding college first baseman in the South. "PAUL" is also a crack stock judge, which is proven by the fact that he scored ninety-eight out of a possible one hundred points on Guernseys at the Virginia State Fair. He is one of the most popular men in College, and deservedly so. An exponent of culture, a man immovable in his convictions, and a Chesterfield in his manner—an honor to our Class.

WALTER M. JOHNSON....Chalybeate Springs, N. C.

"RED"

Electrical Engineering

Age, 21; Height, 5 ft. 8 ins.; Weight, 173

Baseball Squad three years; Varsity Baseball one year; Basket-Ball Squad three years; Varsity two years.

We call him "RED"; but he is "white" all the way thru, with not a sign of the "yellow," as most of the basket-ball teams of the South can testify. Next year we will miss his company, and both the basket-ball and baseball teams will have a vacancy hard to fill.

CARL JAMES KIRBY..... Baywood, Va.

Agriculture

Age, 26; Height, 5 ft. 10½ ins.; Weight, 175

Leazar Literary Society; Y. M. C. A.; Agricultural Club.

"KIRBY" joined us in our Senior year, coming from Virginia Polytechnic Institute. He has proven to be a good student, and a dandy fellow. As a native of Virginia, he has all the characteristics of a Virginian—an energetic and fearless worker, jovial and happy, always level-headed and efficient. "KIRBY" is a man destined to be a success.

JOSEPH LEE, JR.....Landrum, S. C.

"JANIE"

Agriculture

Age, 23; Height, 5 ft. 10 ins.; Weight, 145

Bi-Ag Society; Critic Pullen Literary Society (4); Y. M. C. A. Cabinet (3, 4); State, Interstate, and National Stock Judging Team; Company "Q"; "Barbecue."

"JOE" is the outstanding man of our Class in the newspaper world. His photo was in every publication, from the "Red and White" to the "New York World." The cause of so much publicity is not due to his egotistic, press-agent ability, but to his ability to judge Holstein-Friesian cattle. He was the only Southerner to carry off honors at the 1916 National Dairy Show.

Out of school hours, "JOE" may be found attending his duties as Secretary of the Y. M. C. A.

HENRY ALBERT LILLY.....Mount Gilead, N. C.

"LILY"

Agriculture

Age, 22; Height, 6 ft.; Weight, 145

Bi-Ag Society; Pullen Literary Society; Agricultural Club; Treasurer (1914), Vice-President (1915), Corresponding Secretary (1916-1917), Y. M. C. A.; Company "Q"; "Barbecue."

"LILY" did not belong to the Class of Nineteen-Seventeen originally, but his unfortunate year of sickness was a fortunate one for our Class. It gave us a man of high ideals, an honest, conscientious student, a quiet, but sympathetic, all-round fellow. If his enemies are as few in the world as they are at A. and M., he will be one man without an enemy.

JAMES ROBERT MCARTHURGreenville, N. C.

"JUDGE"

Agriculture

Age, 23; Height, 5 ft. 5½ ins.; Weight, 150

Agricultural Club (1, 3, 4); Pullen Literary Society (3, 4); Company "Q"; "Barbecue."

"JUDGE" believes in a good time; but also finds time to do the textbook stunt, especially in Tr. Summey's English. He is always seen with a smile on his face, and has a good word for everyone. Without him, the Animal Husbandry Division of the Agricultural Students of Nineteen-Seventeen would have felt a distinct loss.

JAMES EDGAR MACDOUGALL.....Amesbury, Mass.

"JIMMIE"

Textile Engineering

Age, 23; Height, 5 ft. 11 ins.; Weight, 190

Saints; President Senior Class; Football Team Four Years, Captain (4); Track Team Four Years, Captain (4); President Y. M. C. A. (3); German Club; Basket-Ball Squad; Manager Book-store (3, 4); H. K. A.

It seems as if we were adding perfume to the rose when we try to "write up" "JIMMIE." His record above shows that Nineteen-Seventeen is unique, in having instead of a motto an individual who carries out as its president all the unspoken ideals of the Class. In him we have a man of the highest integrity, spotless character, a strong, clean athlete, and above all a gentleman. His personal traits have won him a host of friends, a brilliant college career, and the promise of a successful future. You have shown us what you are—it's up to you to prove it to the world now. So here's our hand, "JIM"—and luck to you.

ROBERT WISSNER MCGEACHY..... Raleigh, N. C.

"MAC"

Civil Engineering

Age, 19; Height, 5 ft. 11½ ins.; Weight, 159

Assistant Manager Basket-Ball Team (3), Manager (4); Business Manager "Agromeck" (4); Class Football (2, 3), Manager (3); Corporal (2); Sporting Editor "Red and White" (3); Company "Q"; A. and M. Representative Peace Oratorical Contest (3); Honors in Scholarship (3); K. A.

If you have ever been in front of Watauga about 8.40 a. m., you have no doubt seen a curly, golden-haired youth leaving the building on his way to an 8.20 class. That youth is "MCGEACHY"; but he needs no introduction, as everybody knows him, and likes him. In fact, there is not a more popular man on the Hill.

His business ability has been well proved by the manner in which he handled the Basket-Ball Team and the "Agromeck." As a student, he leads his Class. In fact, none has anything on him but D. Cupid; and he won't tell. "MAC'S" favorite pastime is editing twenty-page letters.

JACOB WYATT MCNAIRY.....Lincolnton, N. C.

"MAC"

Electrical Engineering

Age, 21; Height, 5 ft. 9 ins.; Weight, 165

Electrical Engineering Society; Y. M. C. A.; Company "Q."

+

"MAC" is the official mystery of the campus. We see him coming and going; but whence, and whither, none knows. However, if you want to find out anything about the "juice," just ask him, and you will find out just how little you do know. He is a prime favorite with everyone, and we expect to join the "I-Knew-How-When" Club, all on his account.

+ + +

FRANK COBLE MCNEILL.....Cameron, N. C.

"MAC"

Civil Engineering

Age, 24; Height, 5 ft. 11 ins.; Weight, 144

Pullen Literary Society (3); Y. M. C. A. (1); Sunday Morning Club (2, 3); First Lieutenant Company "G" (4); Sergeant Company "F" (3).

+

"MAC" is the most deliberate man in our Class, if not in the world. He never speaks before he thinks; but he thinks pretty often. He is a true philosopher, who never worries over spilled milk, or anything else beyond his control. Recently he has verified the statement that Wilmington Street leads to Peace.

ELBERT MCPHAUL..... Red Springs, N. C.

"MAC"

Agriculture

Age, 21, Height, 5 ft. 8½ ins.; Weight, 145

Agricultural Club; Y. M. C. A.; Leazar Literary Society; Class Basket-Ball Team (2, 3, 4); Class Football Team (2, 3); Varsity Track Team (2, 3, 4); Corporal (2); Sergeant (3); Company "O"; German Club; Stock Judging Team (4); "Barbecue."

+

"MAC" came to A. and M. to be a Civil Engineer, but changed to Agriculture in his Sophomore year. He loves the ladies, and dancing; but he also finds time to study. He is one of the best 440 men who has ever represented A. and M. on the cinder path. "MAC" is also a good hurdler. He is another Robeson County man who has made good; and he swears by Robeson County.

+++

THOMAS JACKSON MARTIN, JR. ... Pelham, N. C.

"BULL"

Mechanical Engineering

Age, 23; Height, 6 ft. 2 ins.; Weight, 175

Inspector; Sergeant Company "D"; First Lieutenant.

+

To see "BULL" stride thru the trembling Freshmen at the Mess Hall door, who would ever think that he had once been a "short-doc." It is sad, but true; and "BULL" has spent three busy years trying to get the Registrar to forget it. It is reported that he is going to marry into a laundry.

MARK STRUVE MARTINET.....Baltimore, Md.

"MART"

Agriculture

Age, 21; Height, 5 ft. 7½ ins.; Weight, 135

Pullen Literary Society; Agricultural Club; Raleigh Natural History Club; Baa and Bellow Club; Y. M. C. A.; Company "Q"; "Barbecue."

✦

"MART" is a city chap, who has adopted the back-to-the-farm idea. He hails from Baltimore; but his love for natural history and sunshine far surpasses his love for cabarets and white lights. He is the only man in the Class that is an authority on all animal life. "MART" is a naturalist in the highest degree.

Altho he is small in stature, he has a heart that is gigantic in size, and kind to everyone.

✦ ✦ ✦

WILLIAM EMERY MATTHEWS.....Riverton, N. C.

"W. E."

Civil Engineering

Age, 22; Height, 5 ft. 9 ins.; Weight, 150

Corporal (2); First Sergeant (3); Major (4); Leazar Literary Society, Treasurer (3); Team Manager (4); Critic (4); Historian Senior Class; Honors in Scholarship (1); Exchange Editor "Red and White" (4); King of Watauga (4).

✦

Sound ye the cymbals! Bow low thy heads, ye subjects, for lo! the king is here! "WILLIAM EMERY THE FIRST, OF THE HOUSE OF MATTHEWS," King of the commonwealth of Watauga. Yes, this is "we"—cadet-major; boss of Watauga Hall; one of our best scholars; and a mighty good fellow—ask any under-classman in his "section." He is the one member of the C. E. Seventeen's who has not fallen victim to Cupid's wiles. Some skirt will land him yet; they don't pass up good ones like "MATTHEWS"—not often.

MORELL BATTLE MAYNARD.....Kerr, N. C.

"M. B."

Mechanical Engineering

Age, 26; Height, 5 ft. 9 ins.; Weight, 175

Punctuality Roll; Dramatic Club; Instructor in Wood Shop; Vice-President, President Mechanical Engineering Society; Inspector; Company "Q"; Band; Y. M. C. A. Cabinet.

+

He may have been flustered or excited about something, some time, but none has ever caught him in that condition. Here is one that we will wager will be cool at his own wedding. Always quiet and pleasant, he has spent four long years here without making an enemy.

+ + *

GORDON KENNEDY MIDDLETON.....Warsaw, N. C.

"G. K."

Agriculture

Age, 21; Height, 5 ft. 10 ins.; Weight, 145

Bi-Ag Society; Honors in Scholarship; First Sergeant; Lieutenant-Colonel; Team Captain Pullen Literary Society (4); Y. M. C. A.; Agricultural Club; President Duplin County Club (4); Associate Editor "Red and White" (4); A Z.

+

Here comes the "COLONEL," "G. K." has shown his worth as a military man, and "Sunny Jim" says that he will be an A-1 farmer. His only trouble is the girls. The "dear creatures" just will not let him alone. To find him on Monday p. m., you will have to visit—oh, what's the use? It's the same old story, that began when A. and M. was established in Raleigh. The "COLONEL" is one of the most popular fellows in college, with both its faculty and students; and deservedly so, too. A better fellow could not be found.

TODD BOWMAN MISENHEIMER.....Charlotte, N. C.

"Togo"

Textile

Age, 21; Height, 5 ft. 5 ins.; Weight, 135

German Club; Textile Society; K A.

Just imagine; if a rose by any other name should be less sweet. This flower above is known as "MOUSIE," "TODENHEIMER," "WHEELS AND COGS," "GEARS AND GEARING," "TODD," and—Oh, lay off, Mac-Duff; enough is too much, etc. But, thru it all, there permeates, penetrates, scintillates the divine essence of wit, and a sense of humor truly enjoyable.

ZACHARIAH E. MURRELL, JR.....Wilmington, N. C.

"ZEKE"

Agriculture

Age, 24; Height, 5 ft. 8 ins.; Weight, 150

Leazar Literary Society; Agricultural Club; Y. M. C. A.; Assistant in Dairy Laboratory; Student Dairyman; Official A. R. O. Tester; "Barbecue."

If Webster could be found, "ZEKE" would lead him up to argue with him. He can ask more questions than any three men in the Class; and he will fight a steam engine. He is a firm believer in "Give me liberty, or give me death." "ZEKE" is a hard worker, and will make his mark before some of us have settled down.

WALTER LEAKE PARSONS... Rockingham, N. C.

"WAT"

Textile

Age, 22; Height, 5 ft. 7 ins.; Weight, 130

Saints; German Club; Textile Society; Warrenton High School Club; First Lieutenant Company "F"; Pan-Hellenic Council; K Σ.

+

"ARGUE" should be his first name, "GRAVY" his middle, and "POTATOES" his last. Such a fellow is hard to sketch, but we will easily remember him for two things: One, his free, unassuming, good fellowship; and the other, his nickname for Misenheimer, which is to the latter as red is to a lull. All in all, he's one of the best fellows we've ever met.

+ + +

JULIAN HAWLEY POOLE... Jackson Springs, N. C.

"RUBLE"

Agriculture

Age, 25; Height, 5 ft. 11 ins.; Weight, 170

Leazar Literary Society; Baa and Bellow Club; Agricultural Club; Y. M. C. A.; Member of Band three years; Local Editor "Red and White" (3); Charter Member of Dramatic Club; Montgomery County Club; Company "Q"; Stock Judging Team (4).

+

"JOHN HENRY" is not very strong on the ladies, but he is right there when it comes to other stock judging. He was a member of the team that met Virginia Polytechnic Institute. "RUBLE," as he is also known, is a musician. He is never happier than when listening to "Baker's" Band. "RUBLE" is full of good common horse sense, and we predict for him great success as a trainer. His friends are all who know him.

JUNIUS BISHOP POWELL.....Roxobel, N. C.

"FRENCHY"

Chemistry

Age, 21; Height, 6 ft.; Weight, 185

Saints; German Club; President Warrenton High School Club; Editor-in-Chief "Agromeck"; Φ K Σ.

+

"FRENCHY" has shown himself a student, editor, writer, and business man. He is endowed with a brilliant intellect, broad vision of life, and sound judgment. The high esteem in which the students and Faculty hold this lad was demonstrated when they chose him to give them a souvenir of their college days.

Distinctively individual, "FRENCHY" has a good word for everyone, or no word at all. A well-rounded, broadminded man, firm in his convictions, yet gentle in his manner, individual and independent, he is a man destined to be a leader of men. We are proud of our classmate.

+ + +

WALTER ROSCCE RADFORD.....Cane River, N. C.

"RAD"

Agriculture

Age, 22; Height, 5 ft. 10 ins.; Weight, 160

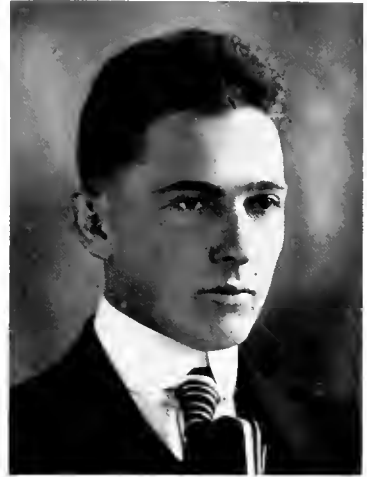

Agricultural Club (1, 2, 3, 4); Junior Debater, Vice-President, Censor, Team Manager Leazar Literary Society; Baa and Bellow Club; Y. M. C. A. (1, 2, 4); Corporal Company "H"; Sergeant Company "G"; Class Football Team (3); Tennis Club; Member of State, Interstate, and National Stock Judging Teams; Chairman of Honor Committee; Company "Q"; "Barbecue."

+

"RAD" is a hustler in every sense of the word. If horses could talk, the college wagon Percheron would vouch for this statement; but never mind! "RAD" was going to have the Barbecue. By his untiring energies, Farmers' Day at A. and M. was established, and the eats were fine.

Whether he will be a farmer, or a wholesale candy merchant, we can not tell. But, wherever he goes, his community will be blessed by having a man who is progressive, and is willing to "put his shoulders to the wheel" to move things along.

HORACE BASCOMB ROBERTSON.....Asheville, N. C.

"BOBBIE"

Textile Engineering

Age, 20; Height, 5 ft. 7 ins.; Weight, 125

Tompkins Textile Society, Secretary-Treasurer (2), Vice-President (3), President (4); Secretary Pullen Literary Society (3); Assistant Manager Track (3), Manager (4); Secretary-Treasurer Athletic Association (4); Pan-Hellenic Council (4); K Σ.

+

For some reason, "ROBBIE" has been branded with the cognomen "OSWALD." When asked to explain, he refers one to "Jake," his arch enemy and opponent.

Because on almost any occasion he will suddenly and without warning "cut a step," Jake says he has educated feet.

After witnessing one of these performances, however, it is doubtful as to whether the word "educated" is properly used.

He is a good student, a hard worker, and a model of temperance.

+

JAMES HENRY ROGERS Hurdle Mills, N. C.

"JIMMIE"

Agriculture

Age, 21; Height, 5 ft. 8 ins.; Weight, 130

V. M. C. A.; Baa and Bellow Club; "Barbecue"; Agr. Club; Pullen Lit. Soc.; Warrington High School Club; Serg. Co. "B" (3); Co. "Q"; Tennis Club; Class Basketball Team (2, 3, 4), Mgr. (3); Asst. Mgr. Varsity Track Team (3); Athl. Ed. "Red and White" (3); Asso. Ed. (4); Bus. Mgr. "Red and White" (4); A Z.

"JIMMIE" is the smallest man in the agricultural division; but his intellectual ability can not be compared with his size. In his studies, he is one of the smartest men in the Class; and he is practical, as well as theoretical. "JIMMIE" has made Ones on all his subjects since his stay in college. Besides his interest in college activities, "JIMMIE" has great enthusiasm in Animal Husbandry, and we predict that he will be ranked among the leading cattle men of the country in a few years. A gentleman in every respect, an enthusiastic worker, a man destined to be a man among men—A. and M. should be proud of her loyal son.

JAMES MALCOLMSON RUMPLE.....Davidson, N. C.

"MAC"

Mechanical Engineering

Age, 23; Height, 5 ft. 8½ ins.; Weight, 165

Mechanical Engineering Society; Honor Roll two years; Assistant Editor "Agromeck"; Saints; Chairman Pan-Hellenic Council; K. A.

+

"Here, hold my glasses!" Lay on, MacDuff—"RUMPLE'S" loose! Here we have a moral, mental, and physical man—ready to stick up for anything that's right and honorable; an all-round good fellow, and one of our shining marks in scholarship. He says he's going to China. (He's been everywhere else, including South America); but China and Cameron Park are rather far removed, and we don't believe he'll make it. Wherever he goes, he's bound to succeed; so here's to you, "MAC."

+ + +

DAVID MORTON ST. SING.....Wise, N. C.

"CHINK"

Mechanical Engineering

Age, 23; Height, 5 ft. 6 ins.; Weight, 135

Dramatic Club; Mechanical Engineering Society; Y. M. C. A.; Company "Q."

+

We have been calling him "CHINK" for so long that we almost believe that he is one. He says that he believes his M. E. course ought to be a great aid to him in running his laundry. If he were not the best-natured man in the world, he would long ago have developed into a "white hope"; for if anyone gets an idea for a joke they try it out on "CHINK."

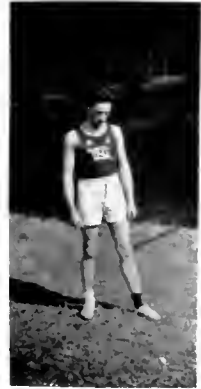

WILLIAM KERR SCOTT.....Haw River, N. C.

Agriculture

Age, 21; Height, 5 ft. 10½ ins.; Weight, 170

Honors in Scholarship four years; Varsity Track Team four years; Capt. Fresh. Track Team; Winner Inter-Collegiate Cross-Country Medal, 1914; Winner Raleigh Rotary Club Cup, 1916; Leazar Lit. Soc., Sec'y 1915, Chaplain 1916, Pres. 1917; Inter-Society Orator 1914, Declaimer 1916; Agri. Club, Sec'y 1914, Treas. 1915, Vice-Pres. 1916; Varsity Debating Team three years; Y. M. C. A. Cabinet 1916, Pres. 1917; Inter-collegiate Debating Council, Sec'y 1916, Chairman 1917; Pres. Class (3); Bi-Ag. Society; Alamaunce Co. Club; Corporal; Asso. Ed. "Red and White"; Senior Debater; Co. "Q"; "Barbecue."

We have often wondered how one man could engage in so many business enterprises, and find time to make Ones. But this is what "SCOTT" has done. To this Alamaunce County boy belongs the honor of establishing intercollegiate debating teams at A. and M. He has been on the Varsity Track Team here four years, and is one of the best cross-country runners in the State. As president of the Y. M. C. A., he has been a decided success. A man of sterling character, and immovable in his convictions, we honor the president of our Junior year.

THOMAS PARK SIMMONS.....Asheville, N. C.

"YAP"

Civil Engineering

Age, 22; Height, 6 ft.; Weight, 167

Company "Q" (4); Y. M. C. A. (1, 2, 3, 4); Scrub Football (2, 3); Class Football (2); Class Basket-Ball (2, 3); Sergeant.

If you are lonesome, hunt up "YAP," and be refreshed by original and unending conversation. Whatever else may be said of him, he has never been at a loss for something to say. He is a mighty hunter, having killed twenty-four coons while bear-hunting Christmas. His chief ambition is to join the Army, and to go to Grove Park Inn wearing a full-dress uniform.

JOHN ALPHEUS STALLINGS.....Durham, N. C.

"J. A."

Civil Engineering

Age, 24; Height, 5 ft. 10½ ins.; Weight, 185

Corporal (2); Quartermaster-Sergeant, Color Sergeant (3); Treasurer Leazar Literary Society (3); Captain and Quartermaster (4); Inspector (4); Leazar Literary Society.

+

This man deserves more credit than he gets. He's a hard worker—even if he does try to fool the Profs. once in a while with that old stall, "I studied it last night, but—." Strange things happen in his room. On one occasion, his trunk floated across the room during the night; and on another his bed dissembled itself, and it took "STAWLINGS" about half the night to find the pieces. This boy is also some little inspector—ask the Freshmen in his section; they'll tell you.

+ + +

CHARLES W. STANFORD, JR.....Tees, N. C.

"CHARLIE"

Agriculture

Age, 21; Height, 5 ft. 9½ ins.; Weight, 160

Y. M. C. A.; Agricultural Club; Alamance County Club; Sergeant; Division Inspector; State Stock Judging Team; Assistant in Soils; Company "D"; "Barbecue."

+

"CHARLIE" came very near deserting us in our Senior year; but he was offered the position of Assistant in Soils, and was thereby persuaded to return. That was a fortunate day for us, as he is one of the most popular and best-liked men in our Class. "CHARLIE" is full of original wit, along with a full share of good common sense. We predict great success for him in the future.

REUBEN B. STOTESBURY..... Swan Quarter, N. C.

"Doc"

Veterinary

Age, 21; Height, 5 ft. 10½ ins.; Weight, 165

Tennis Club; Agricultural Club; Y. M. C. A.; Sergeant (3); Company "Q"; "Barbecue."

+

"DOCTOR STOTESBURY," as he is familiarly known, stands first in the veterinary department. He beats "Nap" Tyler out by a narrow margin. His attainment of this honor is due to his unusually reticent nature, and his habits of deeds, not words. We predict for "STOTES" a great future as a veterinarian; and he will make a good farmer on the side.

+ + +

MICHAEL ALFRED STOUGH.....Cornelius, N. C.

"MIKE"

Textile Engineering

Age, 20; Height, 5 ft. 11 ins.; Weight, 155

Textile Society; Honors in Scholarship; Senior Private; ΦΨ.

+

If silence, the "Golden" kind, could be converted into "double eagles," "MIKE" would be leading "John D." in the bank account race by about 2¾ laps. This paucity of words, however, is the result of two fortunate characteristics—a slight shyness, and a capacity for thought. But once we get under the surface, this classmate shows us his line of bull is not below the standards of excellency set by other and more effusive members of the Textile Club. In the nature of a prophecy, we'd say he just about has the scholarship medal cinched.

LOUIS JOSEPH SWINK.....Fentress, Va.

"LOOIE"

Textile Engineering

Age, 22; Height, 5 ft. 8 ins.; Weight, 143

Sergeant; Math. Instructor; Senior Private.

+

You know the bull about being pleasant when life trips by like the latest hit from musical comedy. It's good dope; and we all smile then—but here's a bird that chirps on the most dismal days. His name, "SWINK," from the old Anglo-Saxon word, fits him, but more on account of his sense of duty than his idea of things as they should be.

+ + +

GURDON LUCIUS TARBOX.....Georgetown, S. C.

"TAR"

Mechanical Engineering

Age, 29; Height, 5 ft. 10 ins.; Weight, 135

Honors in Scholarship, three years; Company "Q"; Roomed with Happy Avant one year.

+

Coming to us from Clemson College, "TAR" labored under difficulties with extra work until his Senior year. As a consequence, it took quite a little while for us to realize what kind of a man he is. But now we know him for a brilliant student and hard worker, and a good companion. Of the many men in our Class whom we expect to make good soon, we prophecy that "TAR" will easily lead.

BEN TEMPLE..... Danville, Va.

"BENNIE," "MONK"

Age, 21; Height, 5 ft. 10 ins.; Weight, 155

Saints; Corporal; Captain Class Football Team (1); Manager Class Basket Ball (1); Sub-Varsity Basket-Ball (1); Class Baseball (1, 2, 3); Sub-Varsity Football (2, 3); Varsity Football (4); Varsity Basket-Ball (2, 3); Captain (4); German Club (1, 2, 3); President (4); Company "Q"; Old Dominion Club; "Barbecue"; K.A.

+

"BENNIE" is a practical, thoro, clear-thinking, sturdy, dependable athlete; and an active participant in the affairs of college life—also a conscientious and well-mannered gentleman. He has no bad habits, is never idle, is held in highest esteem by all who know him, and is of the type admired most ardently when known most intimately. His personal traits have made for him a host of friends, a successful college career, and the promise of a brilliant future.

+ + +

LOUIS DALE THRASH.....Asheville, N. C.

"PAT," "TRASH"

Agriculture

Age, 23; Height, 6 ft.; Weight, 155

Varsity Baseball Team; German Club; Secretary of Buncombe County Club; State, Interstate, and National Stock Judging Teams; Y. M. C. A. Member; Agricultural Club; Company "Q"; "Barbecue"; Skull and Bones.

+

"PAT" joined us in our Sophomore year; and if we had picked another member we couldn't have found a better fellow. To see him play the outfield is a treat that no A. and M. supporter cares to miss. Altho a star in baseball, "PAT" also finds time to make good grades. He is one of the best Stock Judges ever turned out at A. and M. He was a member of the team that made such a remarkable showing at the National Dairy Show, at Springfield, Mass.; as well as a member of the team that met Virginia Polytechnic Institute, at Richmond. The Class of Nineteen-Seventeen is proud to have him as one of its number.

ERNEST CRAIG TURNER.....Mebane, N. C.

"E. C."

Agriculture

Age, 20; Height, 5 ft. 10 ins.; Weight, 150

Leazar Literary Society; Agricultural Club; Bi-Ag. Club; Sergeant; Debating Council; Y. M. C. A.; Company "A"; "Barbecue."

+

"TURNER" is the one practical dairy man in our Class. When he decided to specialize in Animal Husbandry, he went one step further than his classmates—he moved over on the farm; and now he knows all the cows by their first names. We predict for this lad a great future in the dairy business. "E. C." is a good student, and well liked by all. When not on Class, he may be found attending his duties with the herd.

+ + +

NAPOLEON BONAPARTE TYLER....Rich Square, N. C.

"NAP," "Doc"

Veterinary Course

Age, 21; Height, 6 ft. 1 in.; Weight, 160

Y. M. C. A.; Stock Judging Team; Leazar Literary Society; Agricultural Club; Class Baseball (1, 2, 3); Class Football (2, 3); Class Basket-Ball (2, 3); Sub-Varsity Baseball (3); Company "Q"; "Barbecue."

+

"NAP" will make a good horse doctor. He can tell you more in five minutes than you can collect together in an hour. "NAP" has been one important factor in the success of all of the athletic teams of the Class of Nineteen-Seventeen. Their success has been due in no small measure to his skill and knowledge as an athlete. He is a good fellow, and is liked by all.

NATHANIEL WARREN WELDON.....Norlina, N. C.

"RED"

Agriculture

Age, 22; Height, 5 ft. 10½ ins.; Weight, 157

Corporal; First Sergeant; Major First Battalion; Y. M. C. A.; Secretary Pullen Literary Society; Debating Council; Bi-Ag Society; Agricultural Club; Junior Class Debater; Bible-Class Leader; Assistant Instructor in Soils.

+

Together with Stanford and Tony, "RED" is a member of the "Faculty" of the Class of Nineteen-Seventeen. He is never happier than when expounding the mysteries of "colloids" to his "short docks." As Major of the First Battalion, "RED" has proven himself to be a soldier of no mean ability. Altho he has been a busy man, he has found time to make excellent grades, he being a member of the Bi-Ag Society.

✦ ✦ ✦

DRUID EMMET WHEELER.....Asheville, N. C.

"DUJEE"

Textile

Age, 22; Height, 5 ft. 7 ins.; Weight, 145

Textile Society; German Club; Varsity Baseball (1, 2, 3, 4); K.A.

+

In the beginning he was handicapped. You see it was like this: The little cheeb who is pictured lying around without any clothes on took a shot at him with, it must have been, a poisoned arrow. It was hard on us at first; but he has found some antidote, and now one has only to meet him, see his Billikin grin, and shake his hand, to like him.

JOHN FRANCIS WILLIAMS, JR.....Charlotte, N. C.

"CHEMISTRY"

Chemistry

Age, 23; Height, 5 ft. 11 ins.; Weight, 146

Intercollegiate Debating Team; Winner of Inter-Society Orator's Medal (2); Secretary Leazar Literary Society (2); Honor Committeeman Junior Class (3); Vice-President A. and M. Dramatic Club (2); Critic-Elect Leazar Literary Society (3); Inter-Society Junior Debating Team; Four Months' Mexican Border Service in National Guard.

†

To "J. F. WILLIAMS" was left the honor of defending the valor of the Class of Nineteen-Seventeen on the border. And it was ably done. "CHEMISTRY" is an easy-going, soft-toned fellow, whose greatest pleasure lies in doing you a kindness. May he have the same success in the solution of life's problems that he has shown in handling those in the Chemical Lab.

† † †

ROY LEE WILLIAMSON.....Raleigh, N. C.

"RED"

Civil Engineering

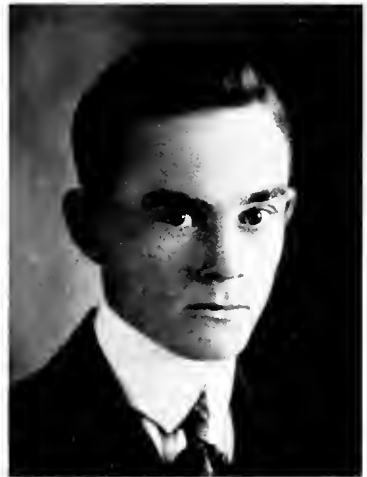

Age, 22; Height, 5 ft. 7 ins.; Weight, 135

Company "Q"; Civil Engineering Society; Y. M. C. A.

†

Here's one of the Raleigh boys. They say these redheaded folks are hard to get along with; but this is an easy-going, good-natured, all-round good fellow. If you've got a case of blues, take it to "RED"; he'll laugh it out of you if anybody can. Nobody has ever seen him when he wasn't grinning. A good student, everybody's friend, and a hard worker, "RED" will be on top sooner or later. Go to it, boy; we are with you.

LOUIS ERNEST WOOTEN.....Fountain, N. C.

"Sis"

Civil Engineering

Age, 22; Height, 5 ft. 9½ ins.; Weight, 140

German Club; Leazar Literary Society, Chaplain (3), Vice-President (3), President (4); Class Baseball (1, 3), Captain (3); Sub-Varsity Baseball (2); Captain Company "G"; Sergeant (3); Sophomore Debater; Secretary-Treasurer Class (4); Y. M. C. A. Cabinet (4); Senior Debater.

In his spring target practice, Cupid is always sure of one hit. He never failed to score a bulls-eye when "WOOTEN" was his target. If "WOOTEN'S" brain is as large as his heart, we predict great success for him. He is one of the best men in our Class, and can always awake from his sweet daydreams in time to get "Ones" on all of his classes.

XAVIER YARO ZENISHEK.....Raleigh, N. C.

"YARO"

Mechanical Engineering

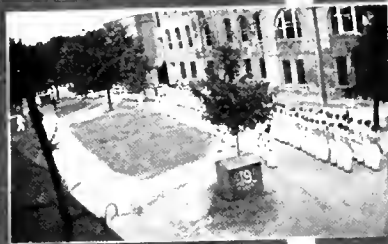

Age, 25; Height, 5 ft. 5 ins.; Weight, 144

Honor Roll three years; Mechanical Engineering Society; Leazar Literary Society.

"X. Y. Z." are his initials; and it all goes to prove that the last shall be first, as the sages said. For proof, see any of the honor rolls for the last three years. "YARO" has shown his contempt for our American customs by finishing a four-year course in three years, and doing it well. A hard student, and a pleasant fellow. He will be missed both in the classrooms and on the campus.

JUNIOR CLASS POEM

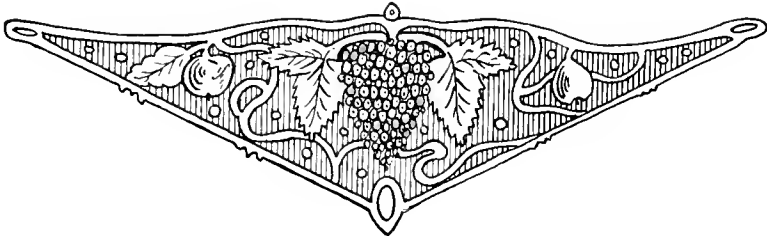

*My duty is to sing the Junior—
The record of the Class of old Eighteen,
But I am modern; I can't be hampered
By form or custom, rhythm or meter;
For it's a simple thing enough, I grant you,
To dream the dream of visions that enchant you;
But tell me how a man with aching head
Can say it as a Poe would have it said,
—In poetic style.*

*I say I give to you the Junior—
The loyal Class of old Eighteen
We came here originally from many places, and
We came with heavy hearts and honest fear.
Full soon the upper-classmen got to know us,
And tried forthwith the campus tricks to show us;
But then you know we came to gather knowledge,
And some of us have made little reps in College,
—On the Registrar's file.*

*I really think you'd love the Junior
The man of the Class of old Eighteen.
We are all good fellows—athletes, soldiers,
A student or two—but mostly good fellows.
We'll hate like sin to leave our alma mater
To become Presidents, or something greater;
But thank the Gods, there is another year
Before us, ere we shed the parting tear,
—And leaving, smile.*

A HISTORY OF THE JUNIOR CLASS

IT WAS in the fall of 1914 that we first came to A. and M. There were two hundred and fifty of us then, and we were ambitious. We left home with a lump in our throats, and a heart full of misgivings. Upon our arrival here, we found things more or less like we had anticipated. We were given a warm welcome. But we enjoyed it (?) and, after the first letter from the folks and from Her, we settled down to work.

In a few days we held our first Class meeting. It was the most disorderly meeting ever held, but we managed to get organized. After the mist of useless talking had cleared away, we found ourselves with the following officers: F. B. Whitaker, *President*; C. B. Skipper, *Vice-President*; and E. F. Lewis, *Secretary*. After the inaugural exercises of the above-named gentlemen, we adjourned. Our next important move was the organization of a football team. A few weeks later, it upheld our hopes by playing a no-score game against the Sophomores. This was the only contest of the season for us. When basket-ball time came around, we fitted out another, and watched it. We nearly won. And we laid the foundation for a good team next year.

The next autumn we shed our greenness, and turned gay—but not for long; for being a Sophomore was not all fun.

We began the year by electing the following officers: E. F. Lewis, *President*; B. B. Stockard, *Vice-President*; and P. L. Canady, *Secretary*. In a few weeks we began our football practice and, before long, we had a strong team developed. It captured the place of Class champions that year. In the spring, we had a good basket-ball team, but it was kept from the championship by losing a game to the Juniors.

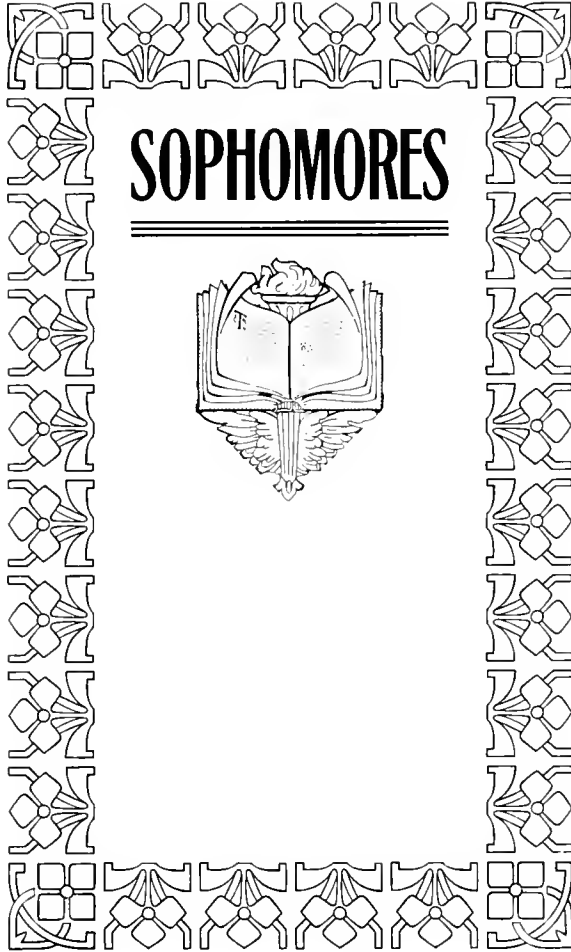

And then, last fall, we came back as Juniors—serious-minded and grave. We are just beginning to realize how important is our work.

This year we have the following men as our Class officers: M. M. Dew, *President*; T. A. Belk, *Vice-President*; and R. A. Crowell, *Secretary*. No Class football was played last fall, and we did not organize a team; but we put out a good basket-ball team this spring. It won the Class championship.

We have given some good men to the athletics: Lewis, Ducey, and Leeper to basket-ball; and Lewis and Evans to baseball. True, Bill is not with us now; but we always like to remember the time when he used to pitch the "Red and White" to glory in the seventh inning.

In our life here, we have made new friendships, and developed new ambitions and desires. We love our alma mater—as all of her sons do love her—and in a few years more we hope to be doing things out in the world of which she will be proud.

—HISTORIAN

THE CLASS OF NINETEEN

(Composed in Blank Verse by the Class Poet)

*We came to A. and M., as green a lot
As e'er this campus saw; but being sure
(Thanks to our elder friends) that we were here
To be improved, we set ourselves to learn
By carrying pails of water for the Sophs.
We worked, they say, quite faithfully at this,
And soon knew what the rattle of dippers meant,
So many useful things we daily learned,
About humility and service to our betters,
That when the year was over we were pleased
To find ourselves a Class above the "green."*

*We had a nice reviving rest, and then
Returned as men determined; we were here
To work, and work is what we have kept up
(The Faculty don't think so, but they're wrong).*

*And as for sports, our Class has stood around
The top, for our good teams are hard to beat.
And when the Varsity wants a man to fill
A vacant place in certain teams, to our
Old Class they come to find a good support.*

*In two more years, our time for parting will
Be here, and then we'll scatter out
To run the Universe on the most modern lines.*

*So fellows, on; let's pull along together,
And show the folks of our beloved State
That we are here to win what comes our way.*

SOPHOMORE CLASS

HISTORY OF THE SOPHOMORE CLASS

THE month of September, 1915, beheld the advent of a new Freshman Class at A. and M.—two hundred and seventy-five strong. We came bearing the usual characteristics of a College Freshman, characteristics already too well known to bear rehearsal. Our awkwardness partly wore off with the passing of the first month, however, and with the aid of the Seniors we organized ourselves and elected our Class officers. Chapin was elected *President*; Clute, *Vice-President*; and Lincoln, *Secretary and Treasurer*. We also adopted the custom of wearing Freshman caps, and were very well pleased with the idea. (We were sorry to see the plan abolished this year.) Owing to the large number of students composing our Class, many of us were compelled to make the "Shacks" our place of abode until the new South Dormitory was completed. But we entered our collegiate career with a determination to gain both knowledge and experience, and at the end of our first year we emerged from college a little wiser, and with a slightly more serious view of life.

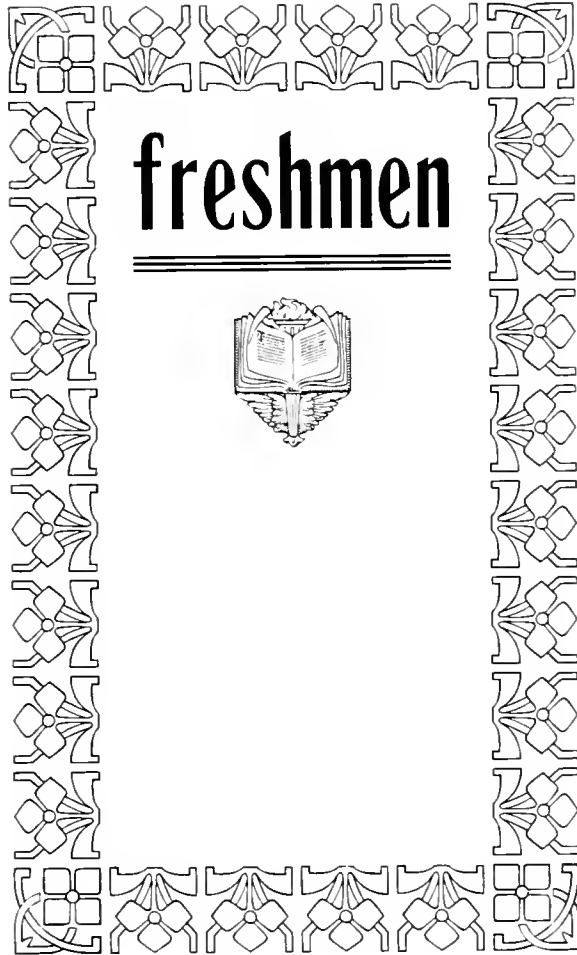

We came back in the fall of nineteen-sixteen transformed into Sophomores, mildly egotistic. Some even presumed to produce a downy patch of mustache upon their upper lips, without fear of having it shorn off. On the morning following our arrival, our Class numerals were blazoned forth in the accustomed places. Indeed, huge red and white Nineteens appeared in spots unapproached by previous Classes. Altho this move may have aroused dread in the hearts of the Freshmen, their fears were groundless, for we had met and decided to uphold the non-hazing policy of A. and M.

Our Class has made a good showing in all branches of athletics. We elected Vanderburg manager, and H. A. McGinn as captain of the football team for last year. As players on the Varsity football team, we furnished Homewood, Lawrence, Weathers, Wagoner, and Chapin. For Varsity baseball, we gave Weathers and Wharton; and among our men who have made excellent showing in track athletics are Click, Potter, Williams, Murrell, and Stoffregen.

Our Class has been reduced considerably in numbers since last September. Some have decided to try their fortunes elsewhere; and not a few gave up their college work to protect Uncle Sam from Mexican invasion along the border. Yet, it is natural for us to think that the present Sophomore Class is still the best in the history of our College.

Here we end our Sophomore year at A. and M. We are thankful to those who have helped us to make the first half of our college life possible, and to those of the Faculty who have aided us to gain that for which we have striven; and we consider it no dishonor to feel proud of having done the tasks which depended upon our own endeavor.

—HISTORIAN

freshmen

FRESHMAN CLASS POEM

*In high school we strived to gain the great knowledge
Sufficient to enter us at A. and M. College;
Our studies were hard; we worked like a man
To reach our high goal—A. and M. so grand.*

*Now we are here, three hundred and more;
Where'er you look there's Fresh meat galore.
We're strong in studies, as well as in number;
Strong in our play, and strong for our slumber.*

*A rap on our door, in comes the O. D.
With a notice for Fresh to go see P. G.
There's no use to argue, nor try to explain,
For every effort will all be in vain.*

*The Registrar will say, "Mr. Fresh, I see,
That last night you failed in your room to be."
There's nothing to say, so a line you get,
And you find experience the best teacher yet.*

*To the Sophs above us we bow our heads,
Sweep all their floors, and make up their beds,
Buckets of water to their rooms we bring—
For the Fresh to the Sophs is a dear little thing.*

*The jokes are quite jolly, and all played in fun—
We realized this, when college life we begun.
We've learned to receive, and our plans we make;
For next year the Sophomore places we take.*

*With drilling, in fact, we were all ignorant.
We soon learned the art from our new Commandant.
At first, our actions were awkward and rough;
Yet we soon 'came efficient, steady, and tough.*

*The Companies were formed, each man to his place;
The steps of the leaders we all tried to trace.
While drilling, we strive for a goal so grand—
A "Captain," at the head of a Company, to stand.*

*The first month past, and flunk slips we found;
Campused next month, we went out up town.
But we studied hard, with all our might;
Each week the following month we got our "one night."*

*Our kind professors we greet with a smile,
Thanking each one for his teachings and style.
To our ruling Seniors, we all give three cheers,
And wish them success thru all their years.*

HISTORY OF THE FRESHMAN CLASS

ON THE seventh day of September, 1916, there were registered about two hundred and seventy new students, who were to compose the Senior Class of Nineteen-Twenty. This is the largest number of new men to ever register at A. and M. College. Altho entering with a greater number than any previous year, we were as green as any preceding Class. The first month seemed like a year to us, and we went to bed at night with a feeling that our peaceful slumber would be disturbed before morning. It was a sight, to see us peering under the bed-covering before retiring, to see if our old friend Mr. Zip had been hidden in its folds by some unknown hand.

After a short time, we began to feel more at home, and to know each other better, so that we began to rest easier and pay more attention to our studies.

On September 23, we elected Mr. H. S. Hill as *President* for 1916-1917. We elected Mr. Plato Durham as *Vice-President*, Mr. E. L. Quillin as *Secretary*, and Mr. J. H. Williams as *Treasurer*. At our next meeting we elected the following officers: Mr. R. L. Black as manager of the football team, Mr. F. D. Cline as captain of the basket-ball team, Mr. H. S. Hill as Class Poet, and Mr. A. L. White, Jr., as Class Historian.

In athletics, we have made a good showing, altho there were no inter-class games. We furnished several men to the Varsity eleven, and the prospects are that we will furnish several men to the basket-ball squad. The outlook of the coming baseball season is that we will furnish some good material for the baseball squad; and also the track team.

So, in conclusion, we wish to extend a friendly hand to all upper-classmen, and thank them for their many kindnesses to us while Freshmen; and also to assure them that we expect to have the largest and best Sophomore Class that ever represented the Red and White.

UNITY

*Four years ago, we started toward the goal
That gleamed before us radiant, bright,
A beacon for each weary soul
Engaged in intellectual fight.*

*As we've toiled onward up the rugged path
Toward the long-sought and cherished prize,
We've borne unmoved the teacher's wrath,
And striven always to look wise.*

*Oh, many a time we've answered all as one
The voice of duty as it made demand;
And followed, learning daily ere the sun
Had disappeared beyond the timeworn sand.*

*And since we've reached at last what seemed to all
Four years ago to be the end of strife,
We now must surely heed a greater call,
And bear the burdens of a larger life.*

*We know not what the future holds in store;
Nor what to us approaching years may bring;
But this, indeed, we know, if nothing more,
That sacred mem'ries to our hearts will cling*

*In years to come, when drifting far apart
Out in the world our busy lives to spend,
May mem'ries clinging round each faithful heart
Keep us united till we reach the END.*

Y. M. C. A. NOTES

THE work of the College Young Men's Christian Association has gone steadily forward from the very beginning of the school year. Increased interest in every phase of its work has been manifested along many lines, and by more students than ever before in the history of our A. and M. Association. Among the first and most significant forward advances of the year, in behalf of the Association, was the action taken last Fall by the whole student-body which resulted in placing the future membership of our Association upon an absolutely new and solid basis. The action as taken and as agreed upon by a written petition, and then signed by the student-body, was this: That at the beginning of each of the two terms, commencing with the second term of the present session, every student, of his own volition, should pay over to the Bursar *one dollar* as his dues, thereby paying two dollars in all for a full membership in the Association. This amount is a reduction of one-third of the regular cost of a membership, and was thus made possible only on the condition that every man became a member.

This innovation has long been desired by many who have felt a keen interest in the work of the Y. M. C. A., and now that it has been adopted, and is working successfully, we can not overestimate its importance from every standpoint. With every man as a member, and with a splendid building and an equipment such as we have, the Association ought to be the biggest, the most vital and democratic organization in College.

Our Association has long since been the center of the religious life of the College, but we now rejoice to see it coming into its fuller purpose of administering to the whole life of the whole student-body. As it is the headquarters for all athletics, the Literary Societies, the College Publications, the social life, etc., of the school, we also covet for it an even greater life, where every man may feel that it is his Club, and that he has a voice in the shaping of its policies. We are glad, therefore, to see evidences of a growing interest along this last-mentioned line in the increased numbers who are frequenting the building. Leading men are more and more taking part in our varied activities. Our Sunday night meetings have increased in numbers by almost fifty per cent. Mission Study, once a dead subject, has two hundred and seventy-five men enrolled in its classes.

While we recognize many failures in the work, we feel grateful for what has been accomplished, and we believe the Association will continue to grow in its influence and usefulness as it strives to create and maintain a healthful Christian influence in the College.

A TOAST TO THE A. AND M. BOYS

*Come girls, fill the crystal cup,
 Brimming up;
Fill it up of cheer and laughter,
Fill it up, and fill it faster;
Crown it with all youthful joys;
 Drink it, drain it,
 Clink your glasses, girls,
To the boys—the Boys of A. and M.*

*Fill again that sparkling cup;
 Brimming up;
Fill it full of nature's brew,
Distilled in rain or snow or dew,
It matters not so it bring to you,
 Strength and health,
 Happiness and wealth,
To you boys, you A. and M. boys.*

*Then fill it up, that generous cup,
 Brimming up.
'Tis Adam's ale, they call it,
'Tis a symbol of all that's pure and true,
Of all that's strong and manly, too,
Of all that we should wish for you, boys,
Of all that you are, boys,
You boys of A. and M.*

*We drink to you a parting cup,
 Brimming up.
With memories of this glad day
To brighten many a morrow,
You bade us come, we came, boys,
We go where you can't follow,
But if you get in trouble, just "holler"
And we'll come boys,
To the boys of A. and M.*

—E. VIOLA KILPATRICK

The above is a toast given by Miss Viola Kilpatrick, of the East Carolina Teachers' Training School, upon the occasion of the girls' annual visit to the Capital City.

- III. All Tea-Hounds of the College.
- IV. The Norfolk and Southern Railroad.

✦ ✦ ✦

WE ADMIT THAT THIS BOOK IS ALL

BUT WE HOPE YOU'LL LIKE IT

MOTHER HUBBARD

(A revised version, written in Modern English according to Dr. Hill's standard.)

Old Mother Hubbard,
Went to her sanitary, washable, all-enamel icebox,
To get her impoverished canine an ossicle (bonelet) ;
But when she arrived there,
For miles you could hear her swear,
She found that the sanitary ice-box contained but a vacuum.

And so her registered, pure bred, prize winning, blue ribbon canine was compelled, much against his wishes, to subsist on a diet consisting of a gaseous mixture composed of one part oxygen and four parts nitrogen, and whatever else he could get.

✦ ✦ ✦

HE HATH METHOD IN HIS MADNESS

—Shakespeare

FAREWELL, OH, OSCULATION!

News Item: Professor Knutt, of Oshkosh University, suggests that Congress be required to pass a bill whereby a gentle pat-pat shall be substituted for a kiss. He states that nearly one-tenth of all the diseases to which man is susceptible are caused by the deadly germs which are conveyed thru kisses.

We will now find the poets and novelists using such forms as these in their new compositions:

From the last lines of a popular novel:

"Billy (the hero) takes Louise (the heroine) in his arms and tenderly placing one hand under her cheek he stoops and gently presses a long and lingering pat-pat upon her ruby lips."

And in the dime novel:

"Deadeye Dick rises and thunders across the stage. 'Pat-pat me, now, Pauline,' he exclaims savagely, 'or I swear by my false teeth that you will rue this day.' 'Never, never,' she replies, 'will I pat-pat you, Deadeye, until you reveal to me the hiding place of your ill-gotten gold'."

And in *Snappy Stories*, when Percival Algernon is writing his daily letter to Lucille:

"Oh, Beloved, if only you were cushioned in the shelter of my arms, and I could look into your eyes—eyes filled with love and passion, then would I press madly upon your luscious lips pat-pat after pat-pat, until again I would awaken thy former passion from the apathetic ashes of forgetfulness."

—J. B. P.

"THERE'S A REASON"

✦ ✦ ✦

"THE BERTH OF A NATION"

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial statements. This includes not only sales and purchases but also expenses and income.

The second part of the document provides a detailed breakdown of the company's assets and liabilities. It lists various categories of assets, such as cash, accounts receivable, and inventory, and compares them against the corresponding liabilities. This section is crucial for understanding the company's financial position at any given time.

The third part of the document focuses on the company's income and expenses. It details the sources of revenue and the various costs incurred during the period. This information is essential for calculating the net profit and understanding the company's operational efficiency.

The fourth part of the document discusses the company's financial goals and strategies. It outlines the management's plans for the future, including investment opportunities and risk management strategies. This section provides insight into the company's long-term vision and its approach to achieving its objectives.

The fifth part of the document concludes with a summary of the key findings and recommendations. It highlights the strengths and weaknesses of the company's financial performance and offers suggestions for improvement. This section is particularly important for stakeholders who are interested in the company's financial health and future prospects.

RUMORS OF AN ENGINEERING DEPARTMENT

We have heard it rumored repeatedly in the past year that there either is, or is to be, an Engineering Department at the North Carolina Agricultural College. However, we hope it is not true; and anyway we don't believe it.

It would be tragedy should our beatific somnolence be disturbed by these pushing, slide-rule-slipping sons of equations!

And now a word to the wise. Let us gather ourselves together, arouse all our sleeping brothers, and rise in our might to push back this invasion of our lotus fields. For, mark my words, should this department be established, it is possible, nay it is even probable, that some few of our faculty might become contaminated, and expect us to do a little work occasionally. It must not be! It shall not be!

"The Y. M. C. A. does not fill the need of the students for spiritual stimulation," says James W. Cooper.

In a stirring address to those interested in spiritual affairs at this College, Mr. James W. Cooper scored the Y. M. C. A.

The point of the address was that the spiritual side of the col-

lege life was not stressed sufficiently. A large and enthusiastic audience was present, and his every remark was applauded to the echo.

A committee consisting of J. W. Cooper, chairman, with Carl Harris, W. C. Clinard, C. B. Skipper, and N. Burfoot as assistants, was appointed. This committee is to be known as "The Committee for the Promotion of Spiritual Influence at A. and M. College."

SCIENCE AND ART OF AGRICULTURE IN GREAT DANGER

Many grave dangers have threatened the great agrarian industries, from the days of our simple grandfathers to the days of their yet simpler grandsons. We have watched in silence, and seen man after man lose interest in his work and drop from the ranks of this great profession. And so we feel called upon to speak, as best we can, in the hope of saving some of our young men from the toils.

My son, beware of these Raleigh chickens. They look innocent. So does a charge of dynamite. But both are capable of producing disastrous results if improperly handled.

It is indeed distressing to note the number of young men who

have enrolled themselves in the courses in "Applied Poultry Chasing." But it is indeed heartbreaking to stand on Fayetteville Street, and note the zeal with which our young men go about the affairs of the "Chicken Lab."

Will they rise at four a. m. to get your breakfast? Will they embroider your galluses? They will not! So beware, unwary youth, of these black-cow toping movie-devouring chickens. They will lead you from the straight and narrow path that leads to the clodhopper and the cornpone.

BARBECUE THE EVENT OF THE SEASON

Brilliant Coup of Agricultural Department

Whose was the master-mind that originated the idea? Let him come forward, and be acclaimed!

Promptly as the first whistle blew for chapel, on Monday, November 23, every man in the Agricultural Department started for the Agriculture Building. There assembled, they marched a short five miles to the chosen site of the banquet. And by the time they had gone thru all the mud they were a sight!

By working with speed, the twenty acres of corn that must be shucked to pay for the use of the ground was finished by noon. Then all assembled for the glorious repast. Barbecued pig, soda crackers, pickles, and water. What more could anyone want? Honestly, it was almost as good as one

of Hurley's feeds when Rufe is in a bad humor. Several men almost got enough to eat. And then we had the privilege of paying for it. Yes, it was a great day.

But the best is always the last. And so it was in this case, for the best part of this glorious day was the aftermath. For the faculty was so pleased with this idea that they declined to deprive themselves of the pleasure of our company over Thanksgiving, and they let us have classes on Friday, and drill on Saturday, too.

This is no time for false modesty. Let the man who originated this idea come forward. What we won't do for him!

A. AND M. TO HAVE PACK OF TEA HOUNDS

Ever since it has been in existence, A. and M. has been keeping pace with the rest of the colleges of the South, in every phase of college life. However, it remained for Squire Blue, of Pinehurst, to discover that we are in danger of losing the proud record. Needless to say, but little time will elapse until the Squire has organized a Pack of Tea Hounds that will outclass anything in the State.

Of course we have had species of the "Tea Hound" here all the time, but up to the present it has been rather a forlorn and neglected animal. The Squire's plan is to collect these animals, organize them, and see that their interests are well looked after. And, once organized, and with such men behind it as Blue, Powell, Temple, Dodson, Grier, Wilson, and Harris,

it goes without saying that numerous blue ribbons will be displayed in the trophy case at the Y. M. C. A. in the near future.

All projects of this sort, of course, need some member of the Faculty to act as sponsor, and to look out for the interests of the organization in general. Squire Blue feels that we are particularly blessed in this respect, and that in Dr. Frederick he has the ideal man for this position. Under his guiding hand, the Tea Hounds will be assured a long and prosperous career.

In line with Captain Broadhurst's suggestion at the beginning of the year, that the upperclassmen endeavor to give the Freshmen some cultural training in the mess hall, the DEAD AS NIGHT wishes to make a little suggestion which might prove of benefit to the incoming Class of Nineteen Twenty-One. This suggestion is to the effect that a committee be selected from the present Junior Class, which shall meet and formulate a set of rules, giving, so to speak, a few hints in regard to the art of eating. These could be issued in the form of a pamphlet, and mailed to the prospective students at the same time that the Y. M. C. A. disseminates its book of misinformation commonly called "The Freshman Bible." The help of the Department of Domestic Science at Meredith might possibly be of assistance.

We would suggest the incorporation of the following hints, which we have gained thru long experience.

1. Never blow on your soup to cool it. Fan it with your hat.
2. Don't try to make more noise in eating it than your neighbor. You'll do it without trying.
3. If you must inhale your soup, use a straw.
4. Don't put your napkin under your chin. Wear a soup-colored shirt.
5. Never mix beer with your watermelon.
6. If you expect to enter society, learn how to entertain an olive before your arrival.
7. As you approach the table, make a running jump for your chair, endeavoring to be the first one seated. Perchance the football captain will see you, and note your speed.
8. If peas are served, don't use your fingers. Borrow your neighbor's knife. Two are faster than one. (The experts at the Experiment Station have announced that they are perfecting a square pea, which is guaranteed not to roll off the knife blade.)
9. If you spill your coffee in your neighbor's lap, instantly assure him that you really didn't care for the coffee, anyway. Tell him not to mind it at all.
10. When a meal is finished, they sometimes bring you a small dish filled with water. This is a finger bowl. When you have soaked your thumbs in this long enough for it to acquire a bouillon appearance, shake off the water on the floor, and wipe your hands on the tablecloth.

SOCIETY NOTES

The Tuesday Afternoon Club will meet on Wednesday of this week instead of Thursday. The meeting had been originally scheduled for Friday, but on account of Mrs. Jones' last baby having cut a new tooth, it was changed to Saturday; but because of the circus it was moved up to Monday, Sunday being a holiday. The date was later changed to Tuesday, as the almanac had forecasted rain for Monday. Its meeting at that time, however, was prevented, due to the Fashion Show at the school-house. The President, Mrs. Smith, announces that the meeting will assuredly be held on the day appointed (unless something happens to prevent).

—J. B. P.

KEEPING HIS WORD—HE TOLD P. G. THAT HE WAS GOING DOWN TOWN TO GET HIS EYES
TREATED

WHAT FOOLS THESE PORTALS SEE!

I was a late Fall day. I was coming out to the College, via the railroad track, and had just left the station, when I noticed another wayfarer walking along the tracks just ahead of me. His dress, manner of walking, and general appearance excited my interest to such an extent that I quickened my steps in order to study him more closely. When I had drawn up within a few feet of him, I slowed down, and carefully gave him the "once over." His attire was so peculiar that it reminded me (if such a thing were possible) of a combination of the habiliments of Don Quixote, Samuel Johnson, and the lamented Ichabod Crane at the time of his last appearance.

"Yes," he said, "I am the 'Wandering Jew.'"

present day. Its glory passed in bygone days. Even the old buildings have not changed much the market-house, theater, and Union Station are the same old relics as in former days. But I understand that a College has been built up in the western part of town in the last few years."

"Yes," I said; "we have a College now, of which the whole State is justly proud."

"Well, well; I'm glad to hear that; and it would give me great pleasure to spend the night, and look it over."

His method of walking was a mixture of the German goose step, the half-and-half, and the modern fox trot. My interest was so great that I hurried my pace until I reached him, when I tapped his shoulder, and apparently surprised him from a deep reverie.

"Hello, old Scout," I said; "you appear to be a stranger in these parts."

"Well, not exactly," he replied; "tho I haven't been here before in over fifty years."

This reply stimulated my already overtaxed interest to such an extent that I asked him what his name might be. He slowly turned, and after giving me a long and quizzical glance, he placed his hand on my neck and drew my head down until he could whisper in my ear, "I am the Wandering Jew." This reply so startled me that I could only look at him intently for the next few minutes, altho a thousand questions occurred to me later which I could have put to such a celebrity. Noting my amazement, he drew closer, and began: "Yes," he said, "I am the one known as the Wandering Jew. I am the bridge across the centuries. I wander ceaselessly from place to place. It requires about a half-century to make a complete circuit. My last visit to Raleigh was just after the close of the War between the States. The town had fared much better than other Southern cities, and I had expected to find a modern and enterprising city when I returned. But, alas, it is the same old town, living in the traditions of the past instead of the possibilities of the

Telling him that I was one of the students, I insisted upon his stopping with me for the night. We were now just emerging from Pullen Park, and as we climbed out of the railroad cut he caught his first view of the College buildings.

"Ah! beautiful, beautiful!" he exclaimed, after resting his eyes upon them for a few moments, and then turning and casting a lingering glance backward his eye lit upon the massive dome which surmounts the Home for the Feeble-Minded.

Turning quickly to me, he exclaimed, "And what is this, another College?"

"Oh no!" I replied; "that is Dix Hill, the Insane Asylum."

"The what?" he asked.

"The home for the nuts, the lighthouse boys, the crazy people."

"Oh," he exclaimed, a gleam of intelligence lighting his face. "This college then is an entirely different kind of place. I take it."

"Sure," I replied; "this is where the youth of the State come to learn things, to get an education."

He appeared so interested that I promised to show him the whole outfit, and took him down to the Mess Hall for supper.

At the table, Eb, McPhaul was talking about his schedule. "By Golly," said Eb, "youghta take Sunny Jim's Farm Management. It's a crisp course; you can go to sleep on class; and the old boy don't mind how much you cut."

My friend picked up his ears. "What is that—cutting?"

"That means not going to your classes," I informed him.

"They seem very delighted to be able to, er, cut," observed he.

"Sure they are. Everybody is."

"Why don't they abolish these useless and tiring classes, then?"

He was an extremely stupid person. I explained to him patiently that classes were not useless, that they were here to go to, and there wouldn't be any College without them. He only said "Hum-m-m-m" in a pungent tone, and dropped the subject.

Shortly after, a "hot dog" came hurtling thru the air, and landed with a thud on the end of the table. My patron looked at it for a few moments, and then picked it up with his fingers and examined it closely.

"What is this?" he inquired.

"A weinie, a hot dog, a sausage," I told him.

"Is it supposed to be an article of food?"

"Yes," I said; "we have them quite frequently. They soak us twelve bucks for this every thirty days."

"What!" he exclaimed. After I had explained, he looked at it closely, and then asked, "But why do they throw them around in this manner, if they have to pay for them?"

"Oh, just because they are not supposed to do it," I replied.

"But didn't you say this was a College—an institution for the training of youth?"

"Yes," I told him.

He only shook his head, and again uttered his significant "Hum-m-m-m."

"Oh Billy! You are such a perfectly adorable dancer," she said.

Later in the evening, we went over to Pullen Hall to a dance. My friend was perfectly amazed to see the large crowd working away at that form of violent exercise called the One-Step. "These people—they are assuredly mad?" he inquired.

"No, no; not at all! Why some of our foremost, most intelligent students are here!" I said, indignantly.

"Ah, it is some religious festival, then?"

"Well, not exactly. It is a form of—of diversion. They do it for pleasure. Don't you see?" No, he didn't see. That yap couldn't see the simplest things. But his attention was distracted by a passing couple. The girl, a small fluffy little thing, murmured to her partner as they glided past, "Oh, Billy, you are such a perfectly adorable dancer, and so big and strong." Billy swallowed two or three times in expressible emotion, and asked her for three dates that week.

"The lady admires the young gentleman very much, doesn't she?" observed my friend.

"Don't you believe it," said I; "she's simply playing politics—pulling his leg."

His glistening eyes widened, "Wha-a-a-t! playing politics—pulling his—"

I hastily turned to him, convinced that he could understand nothing. "She's—oh, she's deluding him, fooling him, playing him for a sucker, leading him on. In reality, she thinks he's a poor simp—which he really is. That's what most girls think of the men they go around with. But you see the men take it all in, get infatuated, and spend all their money on them."

"The men—they believe all this?"

"Yes, absolutely—think it in."

"But you say they are highly intelligent."

"Why—er—yes; but let's go." I took him up to my room, and put him to bed, as he was getting weak.

In the morning, I took him over and let him look at Allen and P. G.; then down to the Y. M. C. A., and let him smell the swimming pool.

After that, we went to the postoffice, where he saw three hundred men wait in line thirty minutes for the mail, with two hundred and fifty of them getting nothing. Then to the Library, where he saw the chairs filled with students reading *Life*, *Puck*, and *Judge*, while Shakespeare, Milton, and Burke remained undisturbed on the shelves. I took him over to the Agricultural Building, where he saw three hundred Freshmen taking Agriculture; and two hundred of them had never been down to the barns.

In the afternoon, we went out to the Athletic Field, where he saw fifty men from a student-body of seven hundred out for football. I took him to the Parade Ground, and showed him the "pride" the students took in their drill.

He had said nothing for the last hour. When I told him we had seen practically everything, he found his voice at last. He thanked me for my kindness, and said he was going—immediately.

"Where to?" I asked.

"Back to Dix Hill," he replied. "The folks over there admit that they're crazy."

"VAN"

"HUGH H."

THE ASPIRANT

"CHARLIE'S"

CENSORED

A TRAGEDY

FATHER was upstairs, and Billy was coming tonight. Only three days before they had had a violent political argument. Words had been passed, and an actual fight narrowly averted. Apologies had been made (for public appearance), but I knew that the feeling of antagonism still existed personally. . . .

At eight-thirty, I opened the door as silently as possible, and took him into the living-room. I knew that everything would be all right if they did not see each other, and this would be easy to do unless Father should come down. Really, it was an awkward situation—to have one's Father and the person to whom one was secretly engaged in the same house, and "at outs" with each other.

. . . .

A slight noise upstairs—Father was slipping on his shoes. Was he merely going to the bathroom, or was he coming down? His door opened—then came the sliding steps along the hallway. Ah—on the stairsteps—down, one, two, three—he was coming—there was no way to avert it. I was terror-stricken—more sliding steps—the knob on the door clicked—he was coming in!

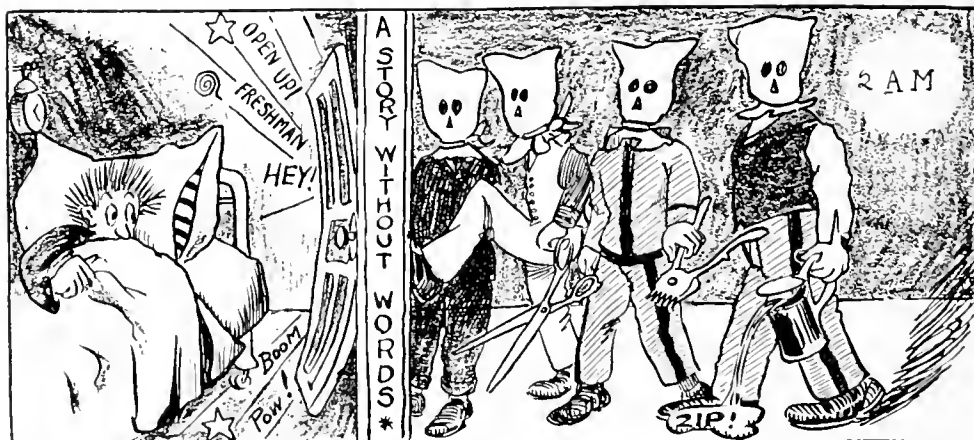

. . . .

With a scream, I rushed from the room, and slammed the door. I visualized the scene—the look of surprise on Father's face—then anger—the sarcastic words—the rush across the room—the uplifted hand—then the blow. And Billy loved me too well to strike back. I could not let Father do this.

. . . .

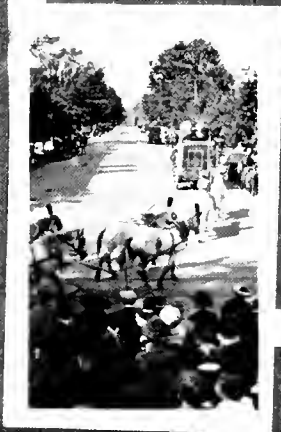

I rushed in; but it was too late. Father had hit him—for a cigar.

VISIBLE MEANS OF SUPPORT

PICTURE OF AN ENGLISH PROFESSOR
READING HIS ONE-THOUSANDTH
ESSAY ON "WHY I CAME TO
COLLEGE"

PICTURE OF A MICROBE AS IT APPEARS
TO THE NAKED EYE

A NEWLY DISCOVERED PSALM

Y daughter, as a small boy abhorreth the washing of his ears, as a woman dreadeth the donning of a tight corset, so doth a man dread the writing of a love letter.

Behold he meeteth a damsel at a summer resort, and they are Twin Souls. Yea, for a whole week he is perfectly devoted; and when he departeth for the city he is filled with sorrow.

He claspeth her hand mightily, and voweth never to forget her; he maketh promise saying:

"I will write thee tomorrow, Beloved"; and lo the damsel believeth him.

Upon the first day she watcheth eagerly for the postman, and is astonished when he bringeth her nought.

Upon the second day she goeth herself to meet him, and inquireth seven times at the hotel desk if the mail hath come.

And upon the third day she weepeth privily, and can not be comforted, for there is still no letter.

And upon the fourth day she arises in her wrath. Yea, she is furious. She gnasheth her teeth, and tosseth her chin, saying:

"Oh, very well; he shall see, he shall see!"

But upon the fifth day she is reconciled. She casteth him out of her thoughts. She fixeth her hair a new way. She beginneth to "take notice." She observeth that there are "other men." She findeth another "Twin Soul."

And upon the sixth day she hath forgotten him entirely.

(For a man's love thriveth upon hope, but a woman's faith must have something more substantial to feed upon.)

And upon the seventh day his letter arriveth.

And lo, the maiden receiveth it with surprise; she openeth it casually; she skimmeth it languidly.

She passeth it to her chum, saying:

"Look who's here. Even he concerning whom I was so silly last week."

And her chum yawneth, and maketh answer, saying:

"I never could perceive what thou sawest in him."

And thus endeth a perfectly good flirtation.

Verily, verily, as a small boy shuddereth at the thought of taking castor oil, as a woman shrinketh from the thought of telling her age, so doth a man shy at the thought of the writing of a letter.

And a handwritten letter from a man is a greater proof of devotion than a thousand spoken promises.

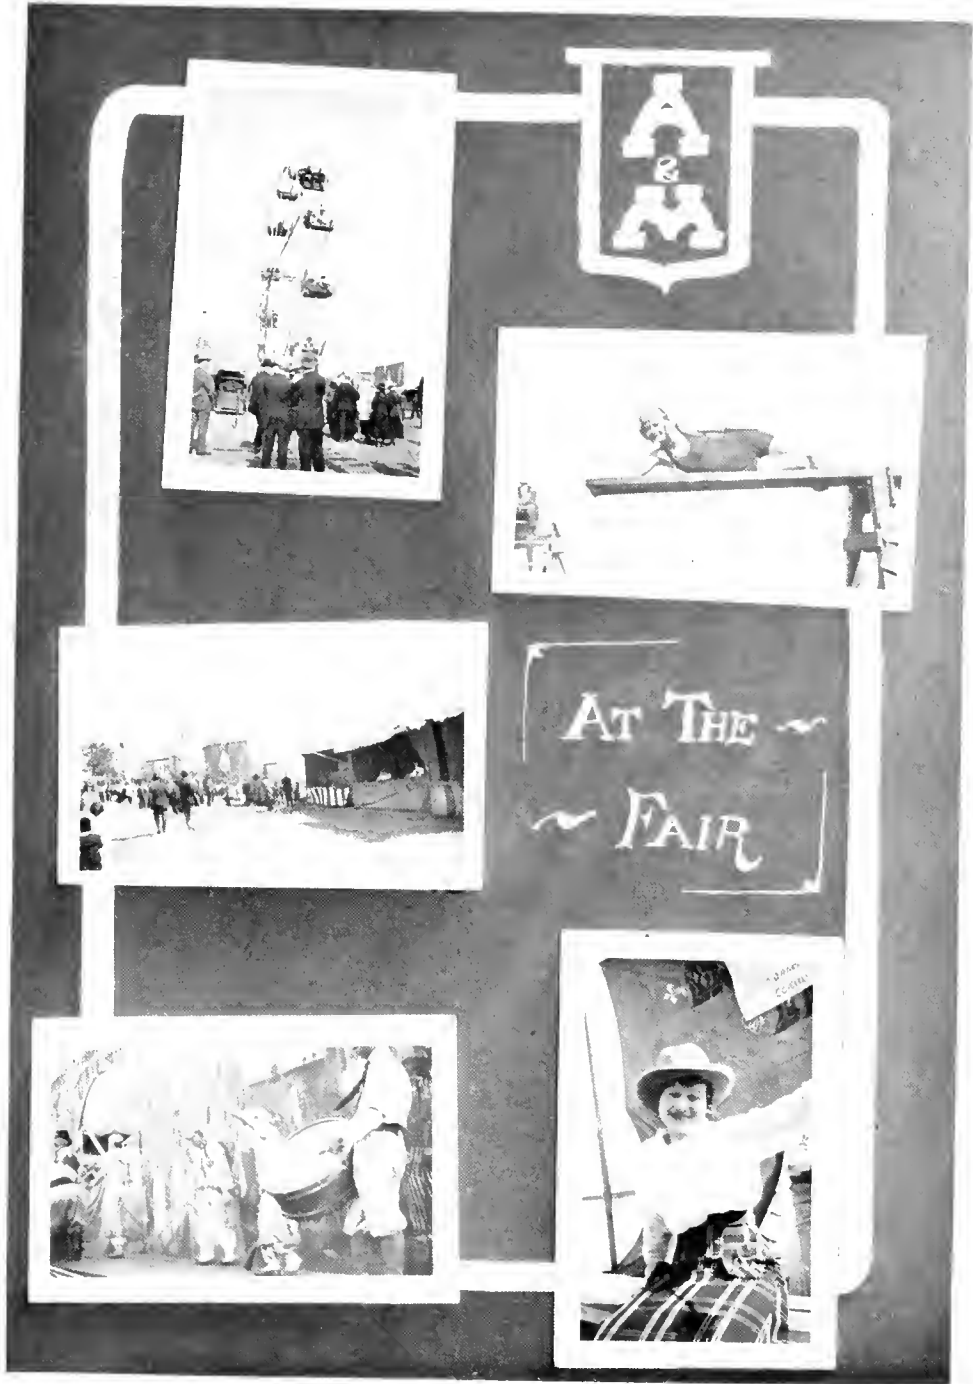

Bushwa!

ODE TO A HATPIN

(Some More Vers Libre—Very Libre)

With apologies to N. A. H.

*O Pointed One,
That rests upon my lady's hair
Like unto the spire of
A village church;
And dost warn me
By thy shining gleam
Of the malice thou dost bear me,
Hear my wail!
In truth, the insidious
Reflection which darts across
Thy surface from yon
Low-turned lamp
Dost foretell, with dire certainty,
Thy never-dying watchfulness;
And when, with tender yearning,
I do encircle the fair Gladys
With my arm,
And wouldst draw her close,
That I might the better, a kiss
Upon her red lips press,
Thou balk'st me,
Getting in my eye.
Or when I, after long talk
And much pleading,
Have succeeded in drawing close
Her radiant form
Into my aching arms,*

*Thou dost again remind me
Of thy presence
By sharpening thy treacherous point
Against my Adam's apple.
And yet, I could forgive thee
All these things, O Evil One;
But why, at parting time,
After I have been sat upon all night
By her wakeful mother,
Whom I have entertained with much gossip
Of the streets,
Or have driven away, by ferocious glances,
My ever-eneroaching rival,
Dost thou insisiently,
When I would in her small ear
Some precious secret whisper,
Plunge thy malignant barb
Deep into my nose?
Why, O Imp of Hell, Why?*

—J. B. P.

PICTURE OF A FRESHMAN IN BED AND
ASLEEP WITH A BUNCH OF SOPHOMORES
KNOCKING AT HIS DOOR

THE CALL TO ARMS

Take a piece of Mess-Hall beeksteak (A); fasten one end to window facing, as shown in diagram. Fasten to other end a cord (B); which is attached to lowered window and run thru pulleys. Now procure an A. and M. rat (C), and place with the steak on retiring. The rat will immediately begin to gnaw on the meat, and by sunrise will have cut thru. This releases weight (D), which closes window, while the student (E) sleeps, and dreams of the Orient.

MY LOVE

(A la Snappy Stories)

MY love is a curious little creature. She's very changeable. When I first see her, she's a darling. She embraces me in her warm clinging grasp. I close my eyes, and feel her soft langourous touch on my hair, my eyes, my lips. Over me there steals a delicious feeling of relaxation. She soothes my emotions. I lift my face in order to get the full benefit of her warm kisses. I adore her.

And then she changes—She becomes cold. Her icy touch freezes me, and my gooseflesh arises. She makes me shudder. My teeth chatter. Her kisses are icy, and I draw my arms over my head to ward off her caresses. Finally, when I can stand it no longer, I leave her.

Yes, she is a variable little thing—my sweetheart; but I love her.
My old *shower-bath*.

"Bureau," Supremacy Commands Attention!

LOOK back over the past years and ask yourself what other Engraving Institution, specializing in college annuals, has wielded so wide an Influence over the College Annual Field?

Ask yourself if College and University Annuals are not better today because of BUREAU PROGRESSIVENESS and BUREAU INITIATIVE?

You know that the BUREAU OF ENGRAVING, Inc. inaugurated the system of Closer Co-operation with college annual boards in planning and constructing books from cover to cover.

Our marked progress in this field commands attention. Our establishment is one of the largest of its kind in this country. Our Modern Art Department of noted Commercial Art Experts is developing Artistic Features that are making "Bureau" Annuals Famous for Originality and Beauty.

And again, the help of our experienced College Annual Department is of invaluable aid. Our up-to-the-minute system, which we give you, and our Instructive Books will surely lighten your Burden.

A proposition from the Natural Leaders in the College Annual Engraving field from an organization of over 150 people, founded over 17 years ago, and enjoying the Confidence and Good Will of the foremost Universities of this country, is certainly worth your while.

Is not the BUREAU OF ENGRAVING, Inc., Deserving of the Opportunity of showing what it can do for - YOU?

The House of Originality

EDITORS' LAST WORD

AND now, gentlemen, you have seen the book. We hope that you like it. If you praise it, you honor us; and if you criticize it, you honor us—for in both cases we shall know that you have done us the honor to read it.

We came to A. and M. primarily in pursuit of that elusive, much-sought-for thing called Education. We are not professional publishers, and we trust that we never shall be. Mistakes we have made, for which we crave your indulgence.

We would like to express our deepest gratitude to those who have made the book possible. To Mr. Ad Goodwin we are especially indebted for the quality and quantity of work that he has contributed to the Art Department. We feel no less appreciative of the kindness of Messrs. Dixon and Rogers, of the Student-Body.

We wish to take this method of thanking Mr. Archie Horton, of Horton's Studio, not only for the faithful work on our pictures and photographs, but also for the many personal favors he has rendered us. We wish also to thank Mr. Sher, of the Bureau of Engraving, of Minneapolis, Minn.; and Mr. Cates, of The Observer Printing House, Charlotte, N. C., for their faithful service and their personal suggestions and interest in the book.

We recommend them to the staff of Nineteen-Eighteen.

“And what is writ is writ—
Would it were worthier.”

—J. B. POWELL

THE END

GOOD BYE, WE DONE OUR DAMNEDEST!
